VERTEX PROJECT NO: 74303

October 26, 2021

PSI Atlantic Arlington MA, LCL
530 Oak Court Drive, Suite 155
Memphis, Tennessee 38117
Attn: Mr. Jesse Morgan

RE: Phase I Environmental Site Assessment
Dudley Street Auto
34 Dudley Street
Arlington, Massachusetts 02476
VERTEX Project No. 74303

Dear Mr. Morgan:

The Vertex Companies, Inc. (VERTEX) is pleased to submit this Phase I Environmental Site Assessment (ESA) report for the above referenced property (the site). The purpose of this assessment was to identify Recognized Environmental Conditions (RECs) in connection with the site. A REC is defined as "the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment." It does not include *de minimis* conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

Our work was conducted in general conformance with proposal P.4199.21, executed by Mr. Jess Morgan on September 23, 2021, and in accordance with the general provisions of the E 1527-13 American Society for Testing and Materials (ASTM) document entitled "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process" for commercial real estate, as well as the U.S. Environmental Protection Agency's (USEPA) All Appropriate Inquiries (AAI) Final Rule of November 1, 2005, as amended December 30, 2013. To the best of our knowledge, this Phase I ESA report is true and accurate.

VERTEX also assessed the site for the potential presence of asbestos-containing materials (ACMs) and lead-based paint (LBP).

We declare that, to the best of our professional knowledge and belief, we meet the definition of an Environmental Professional as defined in 40 C.F.R. Part 312.10. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 C.F.R. Part 312.

Please do not hesitate to contact us at your convenience should you have any questions or comments regarding this report or our recommendations. It has been a pleasure working with you on this project.

Sincerely,

**The Vertex Companies, Inc.**

Project Manager

**VERTEX Project No. 74303**

## 1.0 SUMMARY

On September 23, 2021, The Vertex Companies, Inc. (VERTEX) was retained by PSI Atlantic Arlington MA, LCL Mr. Jesse Morgan, to conduct a Phase I Environmental Site Assessment (ESA) of the Dudley Street Auto facility, located at 34 Dudley Street in Arlington, Massachusetts (the site). According to the Town of Arlington Assessor, the site consists of one 0.767-acre parcel of land, identified as Parcel ID: 55-2-39.B. The site is currently improved with two single-story commercial buildings. The main building totals 10,271 square feet and was constructed circa 1955 with additions to the north and south side of the building in 2000. The garage/shed building is approximately 1,000 square feet was reportedly constructed in 1985. The site is currently occupied by Dudley Street Auto, an auto body repair company, Arlington Glass and Summer Street Auto. Exterior areas on-site consist of asphalt-paved parking areas and drive lanes, wood fencing, and limited landscaped areas. According to the Middlesex South Registry of Deeds, the site is currently owned by 34 Dudley Street, LLC.

The purpose of this assessment was to identify Recognized Environmental Conditions (RECs), including controlled RECs (CRECs) and Historical RECs (HRECs), in connection with the site in connection with due diligence activities related to the planned acquisition of the site.

**ASTM Findings**

- Based on review of available historical information, the site was developed with two single-family residences and Arlington Wet Wash Laundry by the early 1920s. The residences were both razed in the late 1960s. Based on Sanborn Fire Insurance (Sanborn)

maps, the laundry facility was noted to be out of business by 1927. No indication of drycleaning operations was identified. The location of the laundry facility was replaced with B.L. Cummings milk plant in 1932, which operated on the southern portion of the site through the 1950s. The current main site building was originally constructed circa 1955 and has been occupied by various automotive repair and construction companies since that time. Additions to the north and south (paint booth) sides of the building were made in 2000. The site building is currently occupied by Dudley Street Auto, an auto body repair company, Arlington Glass and Summer Street Auto. At the time of the site visit, VERTEX observed three monitoring wells on the site. No additional information regarding the monitoring wells was available. The potential for impacts associated with the long-term on-site automotive repair operations represents a REC.

- Records reviewed indicate there were three underground storage tanks (USTs) present at the site, including a 10,000-gallon gasoline UST, a 1,500-gallon fuel oil UST, and a 500-gallon waste oil UST. According to a prior Phase I ESA, Arlington Fire Department records revealed the 10,000-gallon UST was removed in September 2000. However, records pertaining to removal of this UST and the other two USTs were not identified. In December 2016, IES oversaw the performance a ground-penetrating radar survey (GPR) survey at the site. The results of the survey indicated anomalies consistent with one possible UST present in the southwestern corner of the site. A 3,000-gallon abandoned UST was identified in this area and removed in December 2016. Evidence of a release associated with the UST was not identified. However, IES noted the presence of urban fill at the site when removing the UST, and laboratory analysis of soil sample collected from this area of the site identified several polynuclear aromatic hydrocarbons (PAHs) at concentrations above the RCS-1 reportable concentrations. However, the elevated levels of PAHs identified in urban fill at the site were considered anthropogenic background and exempt from the Massachusetts Department of Environmental Protection (MassDEP) notification requirements. However, in the event of future development, soil at the site will need to be appropriately managed.

- The site is located in an area of commercial and residential properties. Based on review of available historical information, the surrounding properties were primarily residential by the early 1920s, though an auto repair facility was present further to the south. By the early 1950s, a building supply store was present directly west of the site, and a woodworking facility was present south of the site. By the early 1970s, the current multi-tenant office building east of the site was developed and the tennis courts were developed southeast of the site, beyond Mill Brook. Bruce's Tire Shop was developed west of the site in the early 1980s and has had the same occupant since that time. The A1 Automotive Repair facility north of the site was developed by the mid-1990s. Based on review of regulatory databases, environmental concerns or RECs have not been identified with respect to the current or historical use of the surrounding properties.

- VERTEX conducted a regulatory review that included a search of state and federal regulatory databases to identify environmental concerns for the site and surrounding properties. Several facilities were identified within the ASTM search distances of the site. Based on topography, gradient position, and/or regulatory status, none of these facilities are considered to represent RECs in connection with the site.

**Non-ASTM Additional Services**

In accordance with the scope of work, VERTEX conducted additional services as discussed in Section 9.0 of this report, including the assessment of: asbestos-containing materials (ACMs) and lead-based paint (LBP), which did not reveal any Business Environmental Risk associated with the site. However, based on the age of the main site building, ACMs and/or LBP may be present at the site.

**Conclusions**

VERTEX has performed a Phase I ESA in conformance with the scope and limitations of ASTM E 1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, of the property located at 34 Dudley Street, Arlington, Massachusetts. Any exceptions to, or deletions from, this practice are described in Section 8.0 of this report. This assessment has revealed no RECs, Business Environmental Risk, or *de minimis* conditions in connection with the site, with the following exception:

- The long-term use of the site for automotive repair operations represents a REC; and,

- Former USTs without adequate closure represent a REC.

# 2.0 SITE AND VICINITY CHARACTERISTICS

## 2.1 Site Description

The site is located at 34 Dudley Street in Arlington, Massachusetts (the site). According to the Town of Arlington Assessor, the site consists of one 0.767-acre parcel of land, identified as Parcel ID: 55-2-39.B. The site is located on the south side of Dudley Street. According to the Middlesex South Registry of Deeds, the site is currently owned by 34 Dudley Street, LLC. The site location is shown on Figure 1 - Site Locus Map.

## 2.2 Site Improvements

The site is currently improved with two single-story commercial/industrial buildings. The main building totals 10,271 square feet and was constructed circa 1955 with additions to the north and south sides of the building in 2000. The garage/shed building is approximately 1,000 square feet and was reportedly constructed in 1985. The main building is constructed of wood framing with concrete block and vinyl exterior walls, a hip slate roof, and a concrete foundation. The main building interior is separated into office and automotive body repair spaces. Interior office finishes include carpet and concrete floors, painted drywall walls, and suspended grid ceilings with drop-in acoustical tiles. The auto body shop areas are finished with concrete floors, painted and unpainted concrete masonry unit (CMU) block, painted drywall walls, and unfinished ceilings exposing the underside of the roof deck.

Exterior areas on-site consist of asphalt-paved parking areas and drive lanes, wood fencing, and limited landscaping.

For a layout of the site, please refer to Figure 2 - Site Schematic. Photographic documentation of the site and surrounding areas is presented in Appendix A.

## 2.3 Tenant Operations

The site building is currently occupied by Dudley Street Auto, an auto body repair company and two leased tenants: Arlington Glass and Summer Street Auto. No automotive mechanical repairs are conducted onsite. Typical janitorial cleaning chemicals were observed in designated closets throughout the building. No evidence of staining or release was identified. The main building contains offices, several garage bays, and two paint booths. Oil and/or hazardous materials (OHM) noted within this structure included two 55-gallon drums containing waste oil and antifreeze; one 5-gallon paint thinner canister; numerous compressed gas canisters; and numerous small containers (up to 1 gallon each) of paint and various automobile-related fluids. These containers were noted to be in good condition, with no leaks or spills observed. Four above ground vehicle lifts were noted: two within the main building; and two within the shed. The flooring consists of poured concrete, with no floor drains or other discharge points noted on the visible portions of the flooring. No environmental concerns or RECs were identified with respect to current site operations.

## 2.4 Current Uses of Adjoining Properties

The site is located in a residential and commercial area of Arlington, Massachusetts. Adjoining properties were observed (from the site or from public access areas) for signs of RECs and their potential to pose an environmental concern to the site. The uses and features of adjoining properties are described in the following table. The locations of these properties relative to the site are depicted on Figure 2 – Site Schematic.

| NEARBY/ADJOINING PROPERTY SUMMARY | | |
|---|---|---|
| **DIRECTION** | **PROPERTY USE** | **CONCERNS** |
| North | Dudley Street, beyond which is A1 Automotive Repair (39 Dudley Street) and residential properties, followed by the Minuteman Commuter Bikeway. | None |
| East | Multi-tenant commercial office building (26 Dudley Street). | None |
| South | Mill Brook, followed by tennis courts (35 Grove Street) to the southeast and a commercial building (32 Prentiss Road). | None |

| NEARBY/ADJOINING PROPERTY SUMMARY | | |
|---|---|---|
| **DIRECTION** | **PROPERTY USE** | **CONCERNS** |
| Southwest | Dudley Street R, followed by Bruce's Tire & Services (36R Dudley Street). | None; see Section 6.2 |
| West | Dudley Street R, followed by two multi-tenant residential buildings (38/40R Dudley Street). | None |

Multiple properties surrounding the site were identified on various regulatory databases searched, and are discussed further in Section 6.2. No RECs in connection with these properties were identified.

## 2.5 Physical Setting Source(s)

Physical setting sources specified in Section 12.0 of this report were reviewed to provide information about the geology and hydrogeology of the site.

### 2.5.1 Topography

A review of the 2012 United States Geologic Survey (USGS) Topographic Quadrangle Map of Lexington, Massachusetts, indicates that the surface elevation of the site is approximately 80 feet above mean sea level (amsl). The topography of the site slopes gradually to the south. The topography of the surrounding area slopes generally to the east-southeast.

### 2.5.2 Surface Water

No surface water bodies were observed on-site. The closest naturally occurring surface water body is Mill Brook, located adjacent to the south of the site. Review of the U.S. Fish and Wildlife Services National Wetlands Inventory, indicates that no designated wetland areas are mapped on-site. Mill Brook is a designated riverine wetland.

### 2.5.3 Geologic Conditions

According to the U.S. Department of Agriculture (USDA) Web Soil Survey, subsurface soils expected at the site consist primarily of Udorthents wet substratum, which are poorly drained with low capacities to transmit water. No bedrock outcrops were observed during the site reconnaissance. During a previous excavation in the southwestern corner of the site, soils were generally classified as fill material.

### 2.5.4 Groundwater

Based on regional surface topography and previous assessments of the surrounding areas, groundwater flow direction is inferred to be to the east-southeast. Groundwater is anticipated to be encountered at depths ranging from 10 to 20 feet below ground surface (bgs). Actual local groundwater flow direction can be influenced by factors such as local surface topography, underground structures, seasonal fluctuations, soil and bedrock geology, and production wells, none of which were analyzed during this study.

## 3.0 USER-PROVIDED INFORMATION

VERTEX requested the following information about the site from PSI Atlantic Arlington MA, LLC (User):

- An evaluation of the presence of environmental cleanup liens for the site;
- Activity and use limitations (AULs) such as engineering controls (e.g., slurry walls, caps) and land use restrictions or institutional controls (e.g., deed restrictions, covenants) that may be in place for the site;
- Specialized knowledge that includes personal knowledge or experience related to the site or nearby properties based on professional experience or knowledge of the site;
- Fair market value (FMV) to evaluate whether the purchase price of any parcel was significantly below FMV;
- Obvious indicators that involve past or present spills, stains, releases, cleanups on or near the site;
- Common knowledge about use of specific chemicals, possible contamination, or past use of the site and surrounding area; and
- Reason for performing the ESA.

Mr. Jesse Morgan stated that the work was being conducted in support of a potential real estate transaction and helped VERTEX to arrange site access. Mr. Morgan provided VERTEX with prior environmental reports, which are summarized in Section 5.3. No other responsive information regarding the site was provided by the Client.

## 4.0 INTERVIEWS

VERTEX conducted interviews regarding site history and the current on-site operations with the following individuals:

| INTERVIEWS | | |
|---|---|---|
| **NAME/COMPANY** | **TITLE/POSITION** | **INFORMATION PROVIDED** |
| Mike Hynes, Jr./ Dudley Street Auto | Owner | Mike Hynes Jr. escorted VERTEX during the site visit and answered questions pertaining to the site history and operations. |
| Municipal Officials | Various | Provided municipal information. |

# 5.0 HISTORICAL RECORDS REVIEW

Past land uses for the site and adjoining properties were assessed to identify historical practices or conditions that may have impacted the site. This was accomplished by reviewing historical information from several sources including but not limited to interviews with the current owner, review of available previous environmental reports and ownership records, and review of historical information obtained from regulatory sources, aerial photographs, city directories, and historical maps.

## 5.1 Historical Site Use Summary

Based on review of historical information, the site was developed with two single-family residences and Arlington Wet Wash Laundry by the early 1920s. The residences were both razed in the late 1960s. Based on Sanborn maps, the laundry facility was noted to be out of business by 1927. No indication of drycleaning operations was identified. The location of the laundry facility was replaced with B.L. Cummings milk plant in 1932, which operated on the southern portion of the site through the 1950s. The current main site building was originally constructed circa 1955 and has been occupied by various automotive repair and construction companies since that time. Additions to the north and south (paint booth) sides of the building were made in 2000. The site building is currently occupied by Dudley Street Auto, an auto body repair company and two leased tenants: Arlington Glass and Summer Street Auto. No specific RECs were identified with respect to current site operations; however, the potential for impacts associated with the long-term automotive repair operations is considered a REC.

## 5.2 Historical Adjoining Properties Use Summary

The site is located in an area of commercial and residential properties. Based on review of readily available historical information, the surrounding properties were primarily residential by the early 1920s, though an auto repair facility was present further to the south. By the early 1950s,

a building supply store was present directly west of the site, and a woodworking facility was present south of the site. By the early 1970s, the current multi-tenant office building east of the site was developed and the tennis courts were developed southeast of the site, beyond Mill Brook. Bruce's Tire Shop was developed west of the site in the early 1980s and has had the same occupant since that time. The A1 Automotive Repair facility north of the site was developed by the mid-1990s. Based on review of regulatory databases, environmental concerns or RECs have not been identified with respect to the current or historical use of the surrounding properties.

### 5.3 Previous Environmental Reports

VERTEX was provided with the following previous environmental reports for review. VERTEX's comments are in *italics*.

*Phase I ESA, 34 Dudley Street, Arlington, MA; Prepared for Charlene Hasan; Prepared by IES, Inc. (IES) and dated November 15, 2016.*

At the time of the IES assessment, the site was occupied by four commercial tenants, who utilized the property for automotive body and glass repair, general automobile repair, and storage for a construction company. The site was reportedly occupied by Dudley Street Auto Body, Dudley Street Auto Sales, and Arlington Glass from the early 1980s. At the time of the IES assessment, the surrounding properties were also developed similar to their current improvements and occupied by similar tenants.

During the IES site visit, IES noted several garage bays, a paint booth, and various containers of paint, paint thinner, waste oil and other automobile-related fluids. Paint staining was noted in various areas throughout the "Dudley Auto Body" unit *(also observed by VERTEX)*. No associated RECs were identified with the interior observations.

As part of their assessment, IES conducted a review of municipal records which indicated the presence of a 10,000-gallon gasoline UST, a 1,500-gallon fuel oil UST, and a 500-gallon waste oil UST at the site, all installed in 1970. Arlington Fire Department records revealed the 10,000-gallon UST was removed in September 2000. IES did not identify removal documentation for the remaining two USTs.

As a part of their assessment, IES conducted a review of state and federal regulatory databases. Several off-site properties were listed; however, based on distance, gradient position, and/or regulatory status no RECs were identified. The site was identified as a former generator of hazardous waste and listed as No Longer Register (NLR).

The lack of closure documentation associated with two documented USTs onsite was considered a REC. Based on the information reviewed, IES recommended a Ground Penetrating Radar (GPR) survey be performed at the site, in order to determine if the two USTs were still present.

*GPR Survey Results, 34 Dudley Street, Arlington, MA; Prepared for IES; Prepared by Sub-Surface Informational Surveys, Inc. (SIS) and dated December 2, 2016.*

Subsequent to the Phase I findings, IES contracted SIS to conduct a GPR survey at the site in December 2016. The report indicated that typically, 5 to 10 feet spacing is sufficient to detect all large capacity USTs (500-gallon or greater), septic systems and underground utilities with a high degree of certainty. SIS utilized a maximum spacing of 2 feet. Traverses were conducted in both north/south and east/west directions to form a grid pattern. Traverses were conducted around all surface obstructions such as walls, curbs, vehicles, equipment, fence, dumpsters, etc. The results of the survey indicated anomalies consistent with one possible UST present in the southwestern corner of the site.

*UST Removal Assessment, 34 Dudley Street, Arlington, MA; Prepared for Charlene Hasan; Prepared by IES and dated January 9, 2017.*

Subsequent to the GPR findings, IES provided oversight for UST removal activities in December 2016. Periodic soil samples were field screened with a photoionization detector (PID) which did not identify elevated readings above 0.0 parts per million volume (ppmv). The UST was cut open, which revealed a small amount of water present in the bottom of the tank. A Fire Inspector from the Arlington Fire Department was present to witness the removal of the UST. The Fire Inspector stated that a permit to remove the UST was not required due to the contents (water) of the tank.

The tank was transported off-site and five soil samples were collected from the bottom and sidewalls of the excavation. No soil staining or olfactory evidence of a release was identified. PID readings of the five soil samples indicated 0.0 ppmv. One composite soil sample was submitted for analysis of extractable petroleum hydrocarbons (EPHs) with target polynuclear aromatic hydrocarbons (PAHs). One EPH fraction was identified at concentrations well below RCS-1 reporting limits. Several PAHs were identified at concentrations above the RCS-1 standards; however, due to the visual evidence of fill material the sample was subsequently submitted for coal ash microscopic analysis. Two suspect particles were identified to be consistent with coal ash.

Based on the MassDEP's May 2002 "Technical Update – Background Levels of Polycyclic Aromatic Hydrocarbons and Metals in Soil", IES considered that the elevated level of PAHs identified in the urban fill at the site are anthropogenic background and exempt from MassDEP notification requirements.

A liquid sample was also collected from the UST contents and analyzed for EPH with target PAH identifications. Toluene and several PAHs were identified at concentrations well below RCGW-1 reporting limits.

Based on the findings of the UST removal, no additional investigation was recommended.

*VERTEX generally concurs with the findings of the IES reports. Based on the classification of fill to be exempt from MassDEP notification requirements, no associated RECs were identified; however, prior to any future redevelopment of the site, a soil management plan should be considered to appropriately manage the fill at the site, including characterization in the event soil was exported from the site.*

Please refer to Appendix B for a copy of the prior reports.

### 5.4 Prior Ownership

VERTEX obtained site ownership information from the Middlesex South Registry of Deeds. The site currently is owned by 34 Dudley Street, LLC. Available ownership information for this property is summarized below.

| DEED RECORDS REVIEW | | | | |
|---|---|---|---|---|
| **GRANTOR** | **GRANTEE** | **DOCUMENT TYPE** | **BOOK/PAGE** | **DATE** |
| Dudley Trust | 34 Dudley Street, LLC | Quitclaim Deed | 68658/160 | 12/23/2016 |
| Albert J. Pittorino<br>Isabel T. Pittorino | Dudley Trust | Quitclaim Deed | 14589/548 | 04/22/1982 |
| White Fuel Corporation | Albert J. Pittorino<br>Isabel T. Pittorino | Quitclaim Deed | 13656/632 | 03/16/1972 |
| Bavel L Cummings<br>Merle H. Cummings | White Fuel Corporation | Quitclaim Deed | 11326/602 | 05/19/1967 |
| Nicola Lupo | Merle H. Cummings | Quitclaim Deed* | 6403/44 | 06/19/1940 |

*This deed referenced was referenced within the 1967 deed.

Deed records dated prior to 1967 were unavailable for review. No environmental liens or AULs were noted through review of ownership records. Prior owners of the site were not available to be interviewed. Based on historic information reviewed White Fuel Corporation is not considered a REC in connection with the site.

## 5.5 City Directories

VERTEX reviewed historical city directory information for the site and adjoining properties. Excerpts from the city directory report are included in Appendix C. A summary of listings is presented below. Residential listings are excluded.

| CITY DIRECTORY REVIEW | | | |

The site and multiple properties surrounding the site were identified on various regulatory databases searched for this assessment and are discussed further in Section 6.0.

## 5.6 Aerial Photography

VERTEX reviewed aerial photographs including the site and adjoining properties. Copies of the aerial photographs are included in Appendix D. A summary of information obtained from the review is provided in the table below.

| AERIAL PHOTOGRAPHY REVIEW | | | |
|---|---|---|---|
| **YEAR** | **SUMMARY (ON-SITE)** | **SUMMARY (OFF-SITE)** | **CONCERNS** |
| 1939 | The site consists of at least two residences on the northwestern portion and a commercial building on the southwestern portion of the site. | North of the site appears to be Dudley Street, followed by residential buildings and railroad tracks. To the east is undeveloped land. To the south is Mill Brook, followed by undeveloped land. To the immediate west is a commercial building, followed by undeveloped land and a residential or commercial structure along Dudley Street. | None |
| 1955<br>1957 | Relatively unchanged, with the exception of a portion of the current main site building which has been constructed on the eastern portion of the site. | North of the site appears to be Dudley Street, followed by several small residential or commercial buildings and railroad tracks. To the east is undeveloped land and one small building. To the south is Mill Brook, followed by commercial/residential buildings. To the west are a commercial building and a residential building, followed by undeveloped land and increased commercial/residential development. | None |

| AERIAL PHOTOGRAPHY REVIEW | | | |
|---|---|---|---|
| **YEAR** | **SUMMARY (ON-SITE)** | **SUMMARY (OFF-SITE)** | **CONCERNS** |
| 1957 | Relatively unchanged. | North of the site appears to be Dudley Street, followed by several small buildings and railroad tracks. To the east is a commercial structure and undeveloped land, followed by a small residential or commercial building. To the south is Mill Brook, followed by commercial/residential buildings. To the west are a commercial building and a residential building, followed by undeveloped land and increased commercial/residential development. | None |
| 1969 | One residence is present on the northern portion of the site and the previously noted portion of the current commercial structure is depicted. All other structures appear to have been razed. | A small building east of the site was replaced with a current commercial structure. The commercial building immediately west of the site is no longer present; however, additional small buildings have been constructed to the west-northwest. An additional building has been constructed to the south beyond Mill Brook. The remaining properties surrounding the site appear relatively unchanged. | None |
| 1970 | Relatively unchanged; however, the previously remaining residence is no longer depicted. | The surrounding properties appear relatively unchanged, with the exception of an additional commercial/residential building to the west. | None |
| 1978 | Due to the quality of the aerial photograph, specific site improvements cannot be depicted. | Due to the quality of the aerial photograph, specific improvements cannot be depicted. | None |
| 1980 | Relatively unchanged. | The current recreational courts are noted further southeast of the site and a current moderately-sized commercial structure is noted further west-southwest. The remaining properties surrounding the site appear relatively unchanged. | None |
| 1987 | Relatively unchanged. | The current commercial structure is present directly west of the site. The remaining properties surrounding the site appear relatively unchanged. | None |
| 1995 | Relatively unchanged. | A building north of the site has been replaced with the current commercial structure. A current commercial structure was developed southwest of the site. The remaining properties surrounding the site appear relatively unchanged. | None |

| AERIAL PHOTOGRAPHY REVIEW | | | |
|---|---|---|---|
| **YEAR** | **SUMMARY (ON-SITE)** | **SUMMARY (OFF-SITE)** | **CONCERNS** |
| 2008<br>2012<br>2016 | Two additions are noted on the main site building and the current garage structure is clearly depicted on the southern portion of the site. The site appears developed similar to its current configuration. | The properties surrounding the site appear relatively unchanged. | None |

The review of historical aerial photographs did not identify specific environmental concerns in connection with the site; however, the site and multiple properties surrounding the site were identified on regulatory databases searched for this assessment, and are discussed further in Section 6.0.

## 5.7 Topographic Maps

VERTEX reviewed historical topographic maps including the site and surrounding areas. Copies of the topographic maps are included in Appendix E. A summary of information obtained from the review is provided in the table below.

| TOPOGRAPHIC MAP REVIEW | | | |
|---|---|---|---|
| **YEAR** | **SUMMARY (ON-SITE)** | **SUMMARY (OFF-SITE)** | **CONCERNS** |
| 1893 | The site appears to consist of undeveloped land. | The site is bound to the north by Dudley Street. Small, likely residential, structures are noted east, west, and further northeast and northwest of the site. Mill Brook is present directly south of the site, beyond which is undeveloped land and a lone residential or commercial structure, followed by dense development. | None |
| 1903 | The site appears to consist of undeveloped land. | To the north is Dudley Street, followed by railroad tracks. To the east is undeveloped land and Mill Brook. To the south is Mill Brook, beyond which is undeveloped land, followed by residential and/or commercial structures. To the west is undeveloped land, followed by Mill Brook. | None |
| 1943 | The site appears to consist of undeveloped land. | To the north are railroad tracks, followed by a shaded area, indicating development. To the east and west is undeveloped land. To the south is Mill Brook, followed by a shaded area indicating development. | None |
| 1944<br>1946 | The topographic map does not depict specific structures. | The topographic map only depicts public structures (schools and churches). To the north is Dudley Street, followed by railroad tracks. To the south is Mill Brook. | None |

| TOPOGRAPHIC MAP REVIEW | | | |
|---|---|---|---|
| **YEAR** | **SUMMARY (ON-SITE)** | **SUMMARY (OFF-SITE)** | **CONCERNS** |
| 1947 | The site is in an area shaded pink, indicating dense development. Specific improvements are not depicted. | The surrounding properties are in an area shaded pink, indicating dense development. Only public structures, and surrounding roadways and waterways, including Dudley Street to the north and Mill Brook to the south, are depicted. The railroad tracks are also depicted north of Dudley Street. | None |
| 1949<br>1956 | The site is in a shaded area, indicating dense development. Specific improvements are not depicted. | The surrounding properties are in a shaded area, indicating dense development. Only public structures, and surrounding roadways and waterways, including Dudley Street to the north and Mill Brook to the south, are depicted. The railroad tracks are also depicted north of Dudley Street. | None |
| 1971 | The site is in an area shaded pink, indicating dense development. Specific improvements are not depicted. | The surrounding properties are in an area shaded pink, indicating dense development. Only public structures, and surrounding roadways and waterways, including Dudley Street to the north and Mill Brook to the south, are depicted. The railroad tracks are also depicted north of Dudley Street. | None |
| 1985 | The site is in a shaded area, indicating dense development. Specific improvements are not depicted. | The surrounding properties are in a shaded area, indicating dense development. To the north is Dudley Street, followed by railroad tracks. To the south is Mill Brook, followed by a park. | None |
| 2012 | The topographic map does not depict specific structures. | The topographic map does not depict specific structures. To the north is Dudley Street. To the south is Mill Brook. | None |

The review of historical topographic maps did not identify environmental concerns in connection with the site.

### 5.8 Sanborn Fire Insurance Maps

A search of Sanborn Fire Insurance Maps (Sanborn maps) was requested by VERTEX. Copies of the Sanborn maps are included in Appendix F. A summary of the Sanborn map review is provided in the table below:

| SANBORN MAP REVIEW | | | |
|---|---|---|---|
| **YEAR** | **SUMMARY (ON-SITE)** | **SUMMARY (OFF-SITE)** | **CONCERNS** |
| 1922<br>1923 | Two residential dwellings and an outbuilding are noted on the northern portion of the site, along Dudley Street. Arlington Wet Wash Laundry is present on the southern portion of the site, and extends off-site to the west. | To the north is Dudley Street, followed by residential dwellings. To the east is undeveloped land, followed by a residential dwelling. To the south is a 'pond' (Mill Brook), beyond which are residential dwellings and a commercial building. To the west is the extension of Arlington Wet Wash Laundry and a residence, followed by a multi-family dwelling. | None |
| 1927 | Relatively unchanged; however, the laundry facility is noted as "not in operation", and a garage is present associated with a dwelling. | The surrounding properties appear relatively unchanged; however, the commercial building south of the site is noted as an auto repair shop. | None |
| 1951 | B.L. Cummings 'Local Milk' is present on the southern portion of the site, in place of Arlington Wet Wash Laundry. B.L. Cummings includes two buildings, one of which extends off-site to the west. | An additional dwelling is noted north of the site. Further south of the site is a woodworking shop and a manufacturer of leather novelties. To the west is the extension of B.L. Cummings and a building supplies store. The remaining properties surrounding the site appear relatively unchanged. | None |
| 1973 | A portion of the current main site building is present on the central portion of the site. Due to the quality of the Sanborn map, the labeling cannot be interpreted. | To the north is Dudley Street, followed by multiple dwellings, a commercial structure to the northeast and a commercial building that either sells or utilizes fuel oil further north-northwest. To the east are two, apparently current, commercial structures. To the south is Mill Brook, followed by a caterer and the previously noted structures, though the woodworking facility has expanded. To the west a dual-family dwelling and a previously noted dwelling, the previously noted building supply store (which indicates fuel oil service is either offered or utilized), and a new commercial structure, followed by the previously noted multi-family dwelling. | None; see Section 6.0 |

Multiple properties identified on Sanborn maps, including the site were identified on regulatory databases searched for this assessment, and are discussed further in Section 6.0.

## 6.0 REGULATORY RECORDS REVIEW

VERTEX obtained a regulatory database report as specified in Section 12.0. Review of databases and files from federal, state, and local environmental regulatory agencies was used to identify use, generation, storage, treatment, or disposal of hazardous materials and chemicals, or release incidents of such materials that might have impacted the site. The databases discussed in the following sections address ASTM requirements. Additional federal and state databases may have also been reviewed, and if so, are listed in the table below. A copy of the database report is included in Appendix G.

VERTEX's review of these listings assessed the potential for soil, groundwater, and/or soil vapor impacts to the site from on-site listings or listings at surrounding facilities, taking into account such factors as the assumed groundwater depth and flow direction, regulatory status, distance from the site, and other information reported by the regulatory database(s) and/or other sources of information.

A summary of the database information is provided in the following table.

| REGULATORY DATABASE SUMMARY | | | |
|---|---|---|---|
| **DATABASE** | **ASTM RADIUS** | **TARGET PROPERTY** | **SURROUNDING FACILITIES** |
| National Priorities List (NPL)/Proposed NPL/De-listed NPL | 1 Mile | - | - |
| Superfund Enterprise Management System (SEMS) | ½ Mile | - | - |
| SEMS Archive | ½ Mile | - | - |
| Resource Conservation and Recovery Act (RCRA) Corrective Action Report (CORRACTS) | 1 Mile | - | - |
| RCRA Treatment, Storage, and Disposal Facilities (RCRA-TSDF) | ½ Mile | - | - |
| RCRA Hazardous Waste Generators | ¼ Mile | 1 | 8 |

| REGULATORY DATABASE SUMMARY | | | |
|---|---|---|---|
| **DATABASE** | **ASTM RADIUS** | **TARGET PROPERTY** | **SURROUNDING FACILITIES** |
| RCRA Former Hazardous Waste Generators/No Longer Regulated Sites (RCRA NonGen/NLR) | ¼ Mile | 1 | 8 |
| Facility Index System (FINDS) | Target Property | 1 | |
| Emergency Response Notification System (ERNS) | Target Property | - | |
| Federal Institutional Controls/Engineering Controls | ½ Mile | - | - |
| State Institutional Controls | ½ Mile | - | 2 |
| Land Use Control Information System Sites (LUCIS) | ½ Mile | - | - |
| State Hazardous Waste Sites (SHWS) | 1 Mile | - | 83 |
| Solid Waste Facilities/Landfills (SWF/LF) | ½ Mile | - | 1 |
| Solid Waste Recycling Facility (SWRCY) | ½ Mile | - | - |
| Voluntary Cleanup Program (VCP) | ½ Mile | - | - |
| Leaking Underground Storage Tank (LUST) | ½ Mile | - | 19 |
| Leaking Above Ground Storage Tank (LAST) | ½ Mile | - | 6 |
| Underground Storage Tank (UST) | ¼ Mile | - | 7 |
| Aboveground Storage Tank (AST) | ¼ Mile | - | 3 |
| MA Release | Target Property | - | |
| SPILLS | Target Property | - | |
| MA Brownfields | ½ Mile | - | - |
| US Brownfields | ½ Mile | - | - |
| Hazardous Materials Information Reporting System Sites (HMIRS) | Target Property | - | |
| MA Asbestos | Target Property | - | |
| MA Hazardous Waste Generator (HW GEN) | ¼ Mile | 1 | 15 |
| Manifests | ¼ Mile | - | 3 |
| MA Mercury | ½ Mile | - | 2 |

| REGULATORY DATABASE SUMMARY | | | |
|---|---|---|---|
| **DATABASE** | **ASTM RADIUS** | **TARGET PROPERTY** | **SURROUNDING FACILITIES** |
| DRYCLEANERS | ¼ Mile | - | 1 |
| Enforcement & Compliance History Online (ECHO) | Target Property | 2 | |
| Recovered Government Archive Hazardous Waste Site (RGA HWS) | Target Property | - | |
| EDR Manufactured Gas Plants (MGP) | 1 Mile | - | 2 |
| EDR Historical Auto Stations | 1/8 Mile | - | 2 |
| EDR Historical Cleaners | 1/8 Mile | - | 1 |

In addition to the listed databases, EDR maintains proprietary databases of historical auto stations, dry cleaners and manufactured gas plants. These databases are based on aggregation of historical resource data and are not produced by local, state or federal agencies. As such, VERTEX reviews these databases as a part of the historical resource review and includes information from these listings where appropriate.

The database report includes an orphan summary. This summary identifies facilities that are listed in one of the above-referenced databases or lists but do not include complete or accurate geographic data. Consequently, EDR was unable to map the facilities in relation to the site. VERTEX reviewed the orphan summary prior to inspecting the site and surrounding properties. Orphan properties located within ASTM search distances of the site (if any) were incorporated into VERTEX's review.

### 6.1 On-Site Listings

The site was identified as Dudley Street Auto Body on the RCRA NonGen/NLR, FINDS, ECHO, HW GEN, and RCRA-VSQG databases. The site was identified under entity Ken's Auto Repair (though listed under Dudley Street Auto Body) for the former generator of ignitable waste and various

spent non-halogenated solvents, and is currently registered under Dudley Street Auto Body as a VSQG of spent non-halogenated solvents. During the site visit VETRTEX observed one 55-gallon drum containing waste oil and one 55-gallon drum of waste antifreeze. Both drums were labeled as hazardous waste and are reportedly removed by a third-party contractor on an infrequent as-needed basis. The drums were stored on a wood pallet; while no evidence of staining or release was identified, the drums should be stored on a spill pallet as a best management practice. No associated violations or releases were identified. As such, these listings are not considered a REC in connection with the site.

## 6.2 Off-Site Listings

A review of state and federal regulatory records revealed several facilities within ASTM-specified search radii of the site. Facilities located within 500 feet of the site are discussed further in the table below. The remaining facilities are not a concern based on the current regulatory status, relative distance from the site, and/or inferred direction of groundwater flow.

| OFF-SITE STATE AND FEDERAL LISTINGS | | | |
|---|---|---|---|
| **FACILITY** | **DISTANCE AND DIRECTION/ GRADIENT** | **REGULATORY STATUS** | **CONCERNS** |
| **No Location Aid**<br>29 Dudley Street | Northeast-adjacent/ crossgradient | **SHWS, RELEASE:** Release Tracking Number (RTN) 3-18101 was assigned to a release of heating oil reported at this residence in 1998. Initial soil excavation was limited due to structural components, as such, bioremediation was utilized. Prior to bioremediation, two downgradient soil and one groundwater sample were found free of constituents of concern (COCs). The groundwater monitoring well was sampled quarterly during the bioremediation process and remained non-detect for COCs. The bioremediation was successful and a Class A-2 Response Action Outcome (RAO) was filed, indicating additional response actions were not warranted. Based on the lack of downgradient impacts, the remediation performed, and the RAO filed, this release is not considered a REC in connection with the site. | None |

| OFF-SITE STATE AND FEDERAL LISTINGS | | | |
|---|---|---|---|
| **FACILITY** | **DISTANCE AND DIRECTION/ GRADIENT** | **REGULATORY STATUS** | **CONCERNS** |
| **Property**<br>971-977 Massachusetts Avenue | South-adjacent/ crossgradient | **SHWS, RELEASE:** A 21E Assessment was conducted at this property in 1987 in association with proposed redevelopment. The potential for multiple USTs was identified but not confirmed (one 275-gallon fuel oil UST was removed later in the year). Five soil borings (strictly geotechnical) were advanced, three of which were converted to monitoring wells. Groundwater was determined to flow east. Groundwater samples were analyzed for oil and grease and VOCs. The highest oil and grease concentration was 1.6 parts per million (ppm). Chlorinated solvents were detected at concentrations ranging from 2 to 160 parts per billion (ppb). While the constituents were above drinking water standards, it was concluded that no nearby potable water sources were present and the town does not use groundwater as a drinking water source. A follow-up assessment was conducted to address soil conditions. Soil samples were analyzed for VOCs, which were non-detect. While it was concluded that no risk to public health was present and no remediation action was warranted, due to apparent clerical errors, closure of this RTN was never filed. The current status is Pending No Further Action (PENNFA). This property was redeveloped by 1995 with its current improvements.<br><br>The monitoring well nearest the site was approximately 265 feet south and crossgradient of the site , and separated by Mill Brook (potentially a hydrogeologic barrier). No oil and grease was detected in the sample from this well. The highest concentration of chlorinated solvent was tetrachloroethylene (PCE) at 28 ppb. No source of groundwater impacts was identified at this property and no soil impacts were identified. The property was also completely redeveloped. Based on the distance to the areas of impacts and crossgradient location, no RECs in connection with this facility were identified. | None |
| **Arlington Auto Body & Brake, Inc.**<br>14 Dudley Court | 75 feet west/ upgradient | **EDR Hist Auto:** Identified on the EDR Historical Auto Stations database between 1978 and 1983.<br><br>**RCRA-VSQG, HW GEN, FINDS, ECHO:** Identified as a VSQG of ignitable waste and various spent non-halogenated solvents. No associated violations were reported.<br><br>Based on the lack of violations or releases this facility is not considered a REC in connection with the site. | None |

| OFF-SITE STATE AND FEDERAL LISTINGS | | | |
|---|---|---|---|
| **FACILITY** | **DISTANCE AND DIRECTION/ GRADIENT** | **REGULATORY STATUS** | **CONCERNS** |
| **Oxbow Partners**<br>23 Dudley Street | 75 feet northeast/ crossgradient | **HW GEN:** Identified as a generator of hazardous waste. No associated violations or releases were reported, as such, this facility is not considered a REC in connection with the site. | None |
| **Wilfret Brothers Woodworking**<br>22 Prentiss Road | 115 feet south/ downgradient | **RCRA NonGen/NLR, FINDS, ECHO:** Identified as a former generator of hazardous waste. No associated violations were identified.<br><br>**UST:** Identified for the former presence of two 2,500-gallon gasoline USTs, which were installed in 1983 and removed in 1999. No associated releases were reported.<br><br>Based on the lack of violations or releases this facility is not considered a REC in connection with the site. | None |
| **The Bike Stop, Inc.**<br>43R Dudley Street | 135 feet northwest/ upgradient | **RCRA-VSQG, HW GEN:** Identified as a VSQG of PCE. No associated violations or releases were reported, as such, this facility is not considered a REC in connection with the site. | None |
| **Dudley Automotive Service, Inc.**<br>9 Dudley Street | 215 feet west/ upgradient | **RCRA NonGen/NLR, HW GEN, FINDS, ECHO, Manifest:** Identified as a former generator of ignitable waste and various spent non-halogenated solvents used in degreasing. The facility was also identified for the out-of-state transport of waste. No associated violations were identified.<br><br>**UST, Financial Assurance:** Identified for the former presence of two 15,000-gallon bulk heating oil USTs, two 20,000-gallon bulk heating oil USTs, one 10,000-gallon kerosene UST, one 3,000-gallon gasoline UST, one 1,000-gallon gasoline UST, one 1,000-gallon waste oil UST, and one 3,000-gallon diesel UST. All USTs were removed in 1998.<br><br>**LUST, RELEASE:** Two releases were identified at this property. During removal of eight of the nine USTs in 1998, elevated photoionization detector (PID) readings triggered a 72-Hour Reporting Condition, and RTN 3-17565 was assigned. A week later, elevated PID readings encountered during the removal of the ninth UST triggered a sperate 72-Hour Reporting Condition and RTN 3-17599 was assigned. Redial efforts were combined. A total of 300 cubic yards was excavated during UST removal. Follow-up sampling in 1999 identified various petroleum hydrocarbons, polynuclear aromatic hydrocarbons (PAHs), volatile organic compounds), and metals in soil and groundwater, and polychlorinated biphenyls (PCBs) in groundwater. A | None |

| OFF-SITE STATE AND FEDERAL LISTINGS | | | |
|---|---|---|---|
| **FACILITY** | **DISTANCE AND DIRECTION/ GRADIENT** | **REGULATORY STATUS** | **CONCERNS** |
| | | bioremediation system was installed in 2000. Following bio-treatment, soil and groundwater samples identified COCs at concentrations less than S-1 and GW-2/GW-3 standards, respectively. A Level of No Significant Risk was achieved and a Class A-2 RAO was filed in 2002.<br><br>Based on the removal of all USTs, the remedial actions performed, and preparation of a RAO, this facility is not considered a REC in connection with the site. | |
| **ES Johnson Construction Co., Inc.**<br>50 Grove Street | 385 feet east/ cross- to downgradient | **UST:** Identified for the former presence of one 2,000-gallon gasoline UST, which was installed in 1972 and removed in 1992. In RTN files reviewed the property formerly also maintained a 1,000-gallon gasoline UST, a heating oil UST (unknown size), and 275-gallon waste oil AST.<br><br>**LUST, RELEASE:** Two releases were identified at this facility. RTN 3-4317 was assigned following the identification of petroleum impacted soils during UST removal in 1992. Approximately 70 cubic yards of soil was removed from the property. Following excavation, soil samples collected detected COCs below the Method 1 S-1 Standard and groundwater samples collected detected COCs below the Method 1 GW-2/GW-3 concentrations. As such, a Permanent Solution was achieved. RTN 3-11771 was assigned as the result of the removal of the heating oil UST in 1994 and associated elevated PID readings. Bioremediation was conducted in 1996; however, groundwater samples were not submitted as a part of the 1998 RAO Statement. Though not observed, the response to the Notice of Noncompliance was sufficient and the Class A-2 RAO stood.<br><br>Based on the distance from the site, removal of the USTs, and the status of the RTNs, this facility is not considered a REC in connection with the site. | None |
| **51 Grove St Remediation Site/ Town of Arlington PWD/ Arlington DPW Facility**<br>51 Grove Street | 450 feet east/ cross- to downgradient | **RCRA NonGen/NLR:** Identified as a former generator of chromium and benzene. No associated violations were identified.<br><br>**RCRA-SQG:** Identified as a small quantity generator (SQG) of Chromium. No associated violations were identified.<br><br>**UST, Financial Assurance:** Identified for the former presence of three 10,000-gallon gasoline USTs, one 10,000-gallon diesel UST, and one 4,000-gallon gasoline UST. | None |

| OFF-SITE STATE AND FEDERAL LISTINGS | | | |
|---|---|---|---|
| **FACILITY** | **DISTANCE AND DIRECTION/ GRADIENT** | **REGULATORY STATUS** | **CONCERNS** |
| | | **SHWS, SWF/LF, LUST, AST, INST CONTROL, RELEASE, ENF, HW GEN, UIC:** Five releases have been reported at this property. Historically the property was occupied by a mill and saw blade manufacturer in the 1800s, a chrome plating facility in the early 1900s, a MGP in the mid-1900s, and has been occupied by the Arlington Public Works Department (PWD) since 1961. The PWD utilized the property for general storage, vehicle storage, and vehicle refueling. The primary release was assigned RTN 3-4241, following soil and groundwater impacts identified in 1991. COCs included chromium, PAHs, VOCs, petroleum hydrocarbons, lead, and cyanide. Thus far, utility lines have been relocated to clean fill corridors, a MGP purifier and tar separation box was removed, asphalt was installed throughout the property to create a direct contact barrier, and a AUL was filed in 2018. A Class C RAO was filed in 2007 supporting a Temporary Solution and the property is currently in Remedy Operation Status, which includes monitoring and maintenance of barriers. A RAM Plan was submitted in June 2021 in association with the proposed redevelopment of the site. Subsequent releases were associated with activities being performed as a part of this release and have either been closed or an RAO was filed.<br><br>Based on the distance, gradient position, extensive remedial actions and oversight, and on-going improvements, this facility and the associated releases are not considered a REC in connection to the site. | |
| **ACE Cleaners, Inc.** 968 Massachusetts Ave | 495 feet south/ crossgradient | **EDR Hist Cleaner:** Identified on the EDR Historical Cleaners database between 1991 and 2004. No additional listings were identified; as such, this facility is not considered a REC in connection with the site. | None |

## 6.3 Additional Environmental Record Sources

VERTEX contacted local agencies to request information relevant to the site and vicinity. A summary of the agencies contacted, and the information obtained is included in the following table.

| LOCAL RESEARCH SUMMARY | | |
|---|---|---|
| **OFFICE** | **INFORMATION OBTAINED** | **CONCERNS** |
| Town of Arlington Assessor | VERTEX obtained general property information and a property record card for the site. The information obtained from this department can be found throughout this report. | None |
| Middlesex South Registry of Deeds | VERTEX reviewed deed records, which are summarized in section 5.4. | None |
| Town of Arlington Water & Sewer Operations | VERTEX requested initial water and sewer connection dates for the property. The contact could not identify specific connection dates but indicated the site was likely connected during initial development. | None |
| Town of Arlington Building & Zoning | VERTEX reviewed available permits on-file for the site, which were limited to general construction, electrical, roofing and spray booth permits. No permits of environmental concern were identified. | None |
| Town of Arlington Fire Department | VERTEX requested records pertaining to any hazardous material releases, UST/AST permits, and open fire code violations. The information obtained from this department can be found throughout this report. | None |
| Massachusetts Department of Environmental Protection (MassDEP) | VERTEX reviewed available records for the site and select nearby properties. Available information is summarized in Sections 6.1 and 6.2. | None |

# 7.0 SITE RECONNAISSANCE

A site visit was conducted by VERTEX representative Courtney Ciapciak, Senior Project Manager, on October 5, 2021 between 10:30 a.m. and 11:30 a.m. Mike Hynes, Jr., owner for Dudley Street Auto, escorted VERTEX during the site visit and answered questions related to site history and operations.

During the site visit, the weather was cloudy and rainy with a temperature of approximately 55° Fahrenheit. The site visit consisted of a walk-through of the site and visual reconnaissance of neighboring properties from curbside. Photographic documentation of the site visit is included in Appendix A.

## 7.1 Access Restrictions

VERTEX visually and physically observed accessible areas of the site. The interior and exterior of the site buildings were observed. No limitations imposed by physical obstructions or other limiting conditions were observed.

## 7.2 Site Observations

Observations of site conditions were made during the site reconnaissance and are summarized in the table below. Issues of concern are discussed in greater detail following the table.

| SITE OBSERVATIONS | | |
|---|---|---|
| **DESCRIPTION** | **REPORTED/ OBSERVED ON-SITE Y/N** | **COMMENTS** |
| Hazardous Substances and Petroleum Products | Y | Hazardous substances and petroleum products observed included typical janitorial and household cleaning supplies, maintenance chemicals, including paints, waste oil, coolant, and antifreeze. All products were noted to be properly stored with no evidence of staining or release. |

| SITE OBSERVATIONS | | |
|---|---|---|
| **DESCRIPTION** | **REPORTED/ OBSERVED ON-SITE Y/N** | **COMMENTS** |
| UST(s) | N | VERTEX did not observe fill pipes, vent pipes or other evidence of UST(s). VERTEX did not observe operations and/or equipment that are typically associated with significant fuel or chemical storage that typically utilizes USTs. Refer to Sections 5.3 and 6.1 for additional information pertaining to historical USTs onsite. |
| AST(s) | N | Not identified during the site visit. |
| Strong, Pungent, or Noxious Odors | N | Not identified during the site visit. |
| Pools of Liquid | N | Not identified during the site visit. |
| Drums | Y | Two (2) 55-gallon drums were observed within the main building which are used to store waste oil and waste antifreeze. The waste is picked up by a third-party waste hauler for disposal offsite. No evidence of staining or release was identified. No concerns were noted. |
| Unidentified Substance Containers | N | Not identified during the site visit. |
| Polychlorinated Biphenyls (PCB)-containing Equipment | N | Not identified during the site visit |
| Utilities (Electricity/ Natural Gas) | Y | Electricity – supplied by Eversource<br>Natural gas – supplied by National Grid |
| Hydraulic Equipment | Y | Four (4) aboveground hydraulic lifts was observed within the site buildings. No evidence of staining or release was identified. No concerns were noted. |
| Water Supply | Y | Water is supplied to the site by the Town of Arlington. The site was reportedly connected at the time of building construction in the 1950s. |
| Wells | Y | No on-site water extraction wells were identified or reported. However, three (3) groundwater monitoring wells were observed onsite. The site contact was not aware of the monitoring wells and no information was identified during our review of regulatory records. As such, the presence of these wells is considered a Business Environmental Risk. |
| Wastewater | Y | Wastewater discharges from the site are primarily limited to domestic and commercial discharges with no indicated process/industrial type discharges. Sewer service is provided to the site by the Town of Arlington. The site was reportedly connected at the time of building construction in the 1950s. |
| Septic | N | Not identified during the site visit or historical and municipal research conducted. |
| Stormwater | Y | Stormwater at the site drains to the various stormwater catch basins located throughout the paved portions of the site. The catch basins discharge to the municipal stormwater management system. Undeveloped areas drain via natural infiltration. No concerns were identified. |
| Flood Plain | N | According to the Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map (FIRM), the site is located outside of the 100- and 500-year floodplains. |

| SITE OBSERVATIONS | | |
|---|---|---|
| **DESCRIPTION** | **REPORTED/ OBSERVED ON-SITE Y/N** | **COMMENTS** |
| Pits, Ponds, Lagoons | N | Not identified during the site visit. |
| Stained Soil, Stained Pavement, Corrosion to Pavement | N | Not identified during the site visit. |
| Stressed Vegetation | N | Not identified during the site visit. |
| Solid Waste | Y | The site currently maintains one solid waste dumpster serviced by Republic Services, as well as a scrap metal storage area. No evidence of staining or improper dumping were observed. No concerns were identified. |
| Hazardous Waste Management | N | Not identified during the site visit. |
| Heating/Cooling | Y | The site buildings are heated via a series of natural gas-fired rooftop package units. No cooling is provided to the site. |
| Drains, Sumps, Oil/Water Separators/Sand Traps | Y | Janitorial mop sinks were observed in various locations. Floor drains were observed in building restrooms. The drains reportedly discharge to the municipal sanitary sewer system. No evidence of a release was observed in the vicinity of the drains. |
| Vapor Intrusion | Y | As part of this assessment, VERTEX assessed the potential for impacts to the site from potential on- and off-site sources of vapor intrusion. The potential for impacts from off-site properties included a review of current off-site operations (see Section 2.4), a review of historical operations (see Section 5.2), and a review of regulatory database records (see Section 6.2). Potential on- or off-site sources of vapor intrusion were not identified; however, the potential for releases in connection with the long-term auto repair operations and former USTs for which closure documentation was not available represent potential sources of vapor intrusion at the site. |

## 8.0 DATA GAPS/DEVIATIONS

Significant data gaps that would affect VERTEX's ability to identify RECs at the site were not encountered during this assessment. Deviations or deletions from the scope of work defined by ASTM E 1527-13 were not made. Our conclusions regarding the potential environmental impact of nearby, off-site facilities on the site are based on readily available information from the environmental databases and the assumed groundwater flow direction as inferred from nearby subsurface investigations, site topography, and nearby waterways. A detailed file review of each facility was beyond the scope of work; however, VERTEX reviewed pertinent documents for the site and select nearby properties as made available by the MassDEP.

# 9.0 ADDITIONAL SERVICES

The following additional (non-ASTM) services were performed as part of this assessment.

## 9.1 Asbestos-Containing Materials (ACMs)

A visual survey of limited building areas was performed to assess major classes of accessible suspect ACMs that may be present. Observed suspect ACMs included tile flooring and associated mastic as well as other flooring mastic, drywall systems, ceiling tiles, and pipe insulation. The observed suspect ACMs were noted to be in good condition. If discovered during work that will disturb these materials, ACMs must be handled in accordance with the National Emission Standards for Hazardous Air Pollutants (NESHAP) and other applicable local, state, and federal regulations. Business environmental risks with respect to ACMs were not identified for the site.

## 9.2 Lead-Based Paint (LBP)

VERTEX inspected the site for the possible presence of LBP. Based on the age of the main site building (1955), LBP may be present in this structure. Prior to demolition/renovation activities or other activities that could potentially disturb LBP, sampling and analysis of suspect LBP should be performed, and any LBP identified appropriately managed.

## 10.0 CONCLUSIONS

VERTEX has performed a Phase I ESA in conformance with the scope and limitations of ASTM E 1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, of the property located at 34 Dudley Street, Arlington, Massachusetts. Any exceptions to, or deletions from, this practice are described in Section 8.0 of this report. This assessment has revealed no RECs, Business Environmental Risk, or *de minimis* conditions in connection with the site, with the following exception:

- The long-term use of the site for automotive repair operations represents a REC; and,

- Former USTs without adequate closure represent a REC.

# 11.0 SCOPE AND LIMITATIONS

## 11.1 Purpose

The primary purpose of this assessment is to identify, to the extent feasible pursuant to the processes prescribed in ASTM E 1527-13, RECs in connection with the site. As defined in ASTM E 1527-13, a REC is "the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment." It does not include *de minimis* conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. A "historical REC" is defined in ASTM E 1527-13 as "a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)." ASTM E 1527-13 defines the term "controlled REC" as "a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)."

In conducting this assessment, VERTEX followed ASTM E 1527-13, as well as the U.S. Environmental Protections Agency's All Appropriate Inquiries (AAI) Final Rule of November 1, 2005 as amended December 30, 2013. There were no exceptions to or deletions from this

practice, as described in Section 8.0 of the report. ASTM defines good commercial and customary practice for conducting an ESA of a parcel of commercial real estate with respect to the range of contaminants within the scope of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. 9601) and petroleum products. This practice is intended to permit a user to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on CERCLA liability. The practice constitutes "all appropriate inquiries into the previous ownership and uses of the facility in accordance with generally accepted good commercial and customary standards and practices" as defined at 42 U.S.C. 9601(35)(B).

As part of ASTM E 1527-13, Phase I ESAs must be conducted by or under the supervision of a qualified Environmental Professional. The AAI Final Rule defines an Environmental Professional as someone who possesses sufficient specific education, training, and experience necessary to exercise professional judgment to develop opinions and conclusions regarding conditions indicative of releases or threatened releases on, at, in, or to a property, sufficient to meet the objectives and performance factors of the rule. We declare that to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in 40 C.F.R. 312.10. We have the specific qualifications based on education, training and experience to assess a property of the nature, history, and setting of the site. We have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 C.F.R. Part 312.

### 11.2 Detailed Scope-of-Services

As part of this Phase I ESA, and in accordance with the provisions of ASTM E 1527-13, VERTEX performed a visual reconnaissance of the site, noted use of adjoining properties, and conducted historical and regulatory records research. The following provides a more detailed description of the scope of services:

- Visual assessment of the site building(s), if present, and grounds to identify potential for on-site petroleum or hazardous material release(s).

- Visual assessment and categorization of the use of abutting and adjoining properties as potential off-site sources of petroleum or hazardous material contamination to the site.

- Review of readily available state and federal regulatory records related to on-site activities and to potential off-site activities to identify sources of petroleum or hazardous material contamination to the site.

- Review of readily available historical information to assess for potential on-site and off-site sources of petroleum or hazardous material contamination to the site.

- Review of readily available local records related to historical site ownership, usage, and development. This includes obtaining information from local environmental authorities to identify complaints, violations, citations, inspections, environmental liens, AULs, or institutional and engineering controls related to the site.

- Review of readily available documents and other resources for the site and site vicinity to evaluate current and historical development and renovation activities.

- Visual assessment for suspect Polychlorinated Biphenyl (PCB) containing equipment, e.g., transformers, elevators. Please note, this scope of work does not include an evaluation for or testing of suspect PCBs in building materials such as caulking, mastic/adhesives, oil-based paints, coatings and sealants. Currently, there are no regulatory requirements to test in-place building materials for the presence of PCBs. Although testing is not required for in place materials, owners are required to know the content of the waste streams that they generate and potentially sign waste profiles prior to disposal facility acceptance. Therefore, if

renovation or demolition activities are to be conducted at the site that will result in the generation of demolition debris, a contractor or waste disposal facility may request certification of knowledge of the waste stream or testing to determine if the material(s) contain PCBs for proper handling and disposal purposes.

- Visual assessment of the accessible areas of the site and review of readily available public records to assess the presence or absence of the following ASTM E 1527-13 non-scope considerations: ACMs and LBP.

- Preparation of a Phase I ESA report.

### 11.3 Significant Assumptions

Information obtained from the Client, the Client's representative, site representatives, individuals interviewed, and prior environmental reports is considered to be accurate unless VERTEX's reasonable inquiries clearly revealed otherwise.

Conditions observed were considered to be representative of areas that were not observed unless otherwise indicated.

The primary direction of groundwater flow is assumed to follow topography, unless otherwise indicated by measurement of the potentiometric surface or other quantifiable data.

VERTEX reviewed reasonably ascertainable public records with respect to past operations and ownership of the site in an attempt to determine past site usage. VERTEX is not a professional title insurance firm and makes no guarantee, express or implied, that the listing reviewed represented a comprehensive delineation of past site ownership or tenancy for legal purposes. The accuracy and completeness of information maintained in public records by public agencies

or other entities is assumed to be sufficient for the purposes of this Phase I ESA, and independent verification of its validity is beyond the scope of this investigation.

### 11.4 Limitations and Exceptions

Our professional services have been performed, our findings obtained, and our recommendations prepared in accordance with customary principles and practices in the fields of environmental science and engineering. The findings within this ESA utilized information that was practically reviewable per ASTM Practice E 1527-13, meaning that only relevant data relating to the subject site has been incorporated into the findings, disregarding extraordinary analysis of irrelevant data. The investigation conducted for this ESA was limited to data that were reasonably ascertainable, meaning that the information was publicly available, obtainable within the cost and time constraints under the scope of services for this project, and practically available. VERTEX is not responsible for the independent conclusions, opinions, or recommendations made by others based on the records review, site inspection, field exploration, and laboratory test data presented in this report.

It should be noted that all surficial environmental assessments are inherently limited in the sense that conclusions are drawn and recommendations developed from information obtained from limited research and site evaluation. Subsurface conditions were not field-investigated as part of this study and may differ from the conditions implied by the surficial observations. Additionally, the passage of time may result in a change in the environmental characteristics at this site and surrounding properties. VERTEX does not warrant against future operations or conditions, or against operations or conditions present of a type or at a location not investigated. VERTEX does not assume responsibility for other environmental issues that may be associated with the subject site.

This study is not intended to assess or otherwise determine if soil contamination, waste emplacement, or groundwater contamination exists. These data are accessible only by sampling

of subsurface material and groundwater through the completion of soil borings and the installation of monitoring wells and the chemical analyses of soil and groundwater samples. The scope of work, determined by the client, did not include these activities.

In view of the rapidly changing status of environmental laws, regulations and guidelines, VERTEX cannot be responsible for changes in laws, regulations, or guidelines that occur after the study has been completed and that may affect the subject site.

It must be noted that no investigation can absolutely rule out the existence of hazardous materials at a given site. This assessment has been based upon prior site history and observable conditions. Existing hazardous materials and contaminants can escape detection using these methods.

There were no significant data gaps or accessibility limitations that would affect VERTEX's ability to identify RECs at the sites, as discussed in Section 8.0.

While VERTEX may comment on environmental compliance matters that fall under the scope of this assessment, this study does not constitute a regulatory compliance audit, and does not document compliance with applicable state, federal, or local regulations.

### 11.5 Special Terms and Conditions

No special Terms and Conditions were agreed upon between the User and the Environmental Professional.

### 11.6 User Reliance

This report is for the exclusive use of PSI Atlantic Arlington MA, LLC. No other party shall have the right to rely on any service provided by VERTEX without prior written consent. Use of this report by any other party shall be at such party's sole risk.

Re: Phase I Environmental Site Assessment
34 Dudley Street
Arlington, MA
IES Project #2016-11-0825

Dear Mr. Hasan,

As requested, and in accordance with the Terms of our Contract, IES, Inc. has conducted a "Phase I Environmental Site Assessment" (ASTM E 1527-13) of the above referenced property. Please note that the USEPA has established that the ASTM E1527-13 Standard is consistent with the requirements of the final rule for All Appropriate Inquiries (AAI) and may be used to comply with the provisions of the rule.

The following is our **Executive Summary**, which details the major findings of the report:

1. This Phase I Environmental Site Assessment consisted of a historical review, a site inspection, and research of State and local files, as depicted in Sections 1 through 6 of this report.

2. The site consists of one, 0.767-acre, irregular-shaped parcel of land located at 34 Dudley Street in a mixed residential and commercial area of the Town of Arlington, MA. The subject site is currently occupied by two commercial buildings, which include a one-story, concrete-block and vinyl-sided structure and a one-story, wooden garage. The on-site structures currently contain four commercial occupants, which include an automobile body repair shop (Dudley Street Auto Body); a glass company (Arlington Glass); a construction company (McDonald Construction); and an automobile repair shop (Kenny Walsh).

3. The on-site structures were built around 1940 and 1982; are currently heated with natural gas and/or electricity; and are serviced with municipal water and sewer. In the past, the site building was heated with fuel oil, as indicated in Arlington Assessor's records.

4. The site was occupied by "Dudley Street Auto Sales", "Dudley Street Auto Body", and "Arlington Glass" since the early 1980's. Prior to the 1980's, the site was used for the storage and repair of taxi cabs since 1970. Prior to the 1970's, the northern portion of the site contained a residential

dwelling, which was razed in 1970; and the southern portion of the site was occupied by a milk plant (B.L. Cummings), which was constructed in 1932. Prior to the 1930's, the southern portion of the site contained a laundry (Arlington Wet Wash Laundry).

5. According to a 2000 IES report previously prepared for the site, municipal records indicate the presence of a 10,000 gallon gasoline UST; a 1,500-gallon fuel oil UST; and a 500-gallon waste oil UST at the site, which were installed in 1970. IES noted that "no documentation regarding the removal of these tanks was on file with Arlington town offices".

6. "Recognized Environmental Conditions" (REC's) identified during this assessment include the evidence of the presence of two existing USTs and one former UST at the site. According to a 2000 IES report, municipal records indicate the presence of a 10,000 gallon gasoline UST; a 1,500-gallon fuel oil UST; and a 500-gallon waste oil UST at the site, which were installed in 1970. A review of Arlington Fire Department records revealed the 10,000-gallon UST was removed in September of 2000. The Fire Department did not have any records of the removal of the other two USTs or of any confirmatory soil sampling performed during the 10,000-gallon UST removal.

7. No "Historical Recognized Environmental Conditions" (HRECs) or Controlled Recognized Environmental Conditions (CRECs) were identified during this assessment.

8. Potential on-site environmental threats include the use of the site for automobile repair and body work dating back to the 1980's; and the associated above ground storage of OHM in the site building. In addition, the former use of the site as a taxi cab repair facility is also noted as a potential on-site environmental concern. In addition, the listing of a business at the site (Ken's Auto Repair) as a RCRA Generator (MAD037686433), which is "No Longer Regulated" (NLR) is also noted as a potential on-site environmental threat.

9. Potential off-site environmental threats identified during this assessment include the westerly and northerly abutting automobile repair facilities (Bruce's Tire and Auto Service, Summer Street Auto Care, and A1 Automotive) located at 36 and 39 Dudley Street. Additional potential off-site environmental threats include the nearby RCRA Generators at 23 Dudley Street (MV7818927521), 14 Dudley Court (MAD066583188), 22 Prentiss Road (MAD001039411), and 9 Dudley Street (MAD038332714); the UST facilities at 9 Dudley Street and 22 Prentiss Road; and the DEP listings at 29 Dudley Street (RTN 3-18101) and 9 Dudley Street (RTNs 3-17565 and 3-17599). However, mitigating factors include the RAO status of RTNs 3-18101, 3-17565, and 3-17599.

   Further, please note that if any contamination is detected at the site that originates from an off-site source, the site owner has the option to file a "Downgradient Property Status Submittal" pursuant to 310 CMR 40.0180. According to 310 CMR 40.0184(1), "any person who establishes and maintains Downgradient Property Status....shall not be subject to the deadlines for Tier Classification and Comprehensive Response Actions" and applicable fees.

10. "We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of 34 Dudley Street in Arlington, MA, the property. Any

exceptions to, or deletions from, this practice are described in this report. This assessment has revealed evidence of a Recognized Environmental Condition (REC) in connection with the property.

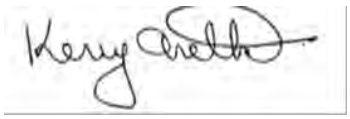

11. Due to the aforementioned REC and potential on-site and potential off-site environmental threats, the subject site is considered a **"Moderate/High Environmental Risk"** (see **Attachment "AAA"**) regarding soil and/or groundwater contamination. In addition, it is our opinion that in accordance with IES's Cleanup Risk Rating, which is depicted in **"Attachment AA"**, IES would classify the site as a **"Moderate/High Cleanup Risk"** due to the absence of any removal documentation association with two USTs at the site and the absence of confirmatory soil sampling associated with the 10,000-gallon fuel oil UST that was removed from the site.

12. It is the recommendation of IES, Inc. that a Ground Penetrating Radar (GPR) survey be performed at the site, in order to determine if the two USTs with no removal documentation are still present. The cost of a GPR survey is approximately $2,500.00 and can be completed in approximately 2 weeks. If any abandoned USTs are identified at the site, a UST Removal program would be warranted.

    In addition, if you desire to conclusively determine if the REC, and potential on-site and off-site sources of contamination have impacted the soil and/or groundwater at the site, a subsurface investigation is recommended. This investigation should include the advancement of test borings, monitoring well installation, soil sample screening, and laboratory analysis of soil and/or groundwater samples. The cost of a Phase II Subsurface Investigation is estimated at approximately $9,000.00, and can be completed within 3-4 weeks.

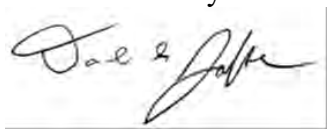

Furthermore, if additional data becomes available, or related quantitative or qualitative analysis is performed, IES should review the material to determine if the findings in this report should be modified.

Respectfully submitted,
IES, Inc.

# PHASE 1
# ENVIRONMENTAL SITE ASSESSMENT
# 34 Dudley Street
# Arlington, MA

## INTRODUCTION

### 1.1. PURPOSE

At the request of Ms. Charlene Hasan, IES conducted a "Phase I Environmental Site Assessment" (ASTM E 1527-13) at the property located at 34 Dudley Street in Arlington, MA. Please note that the USEPA has established that the revised ASTM E1527-13 Standard is consistent with the requirements of the final rule for All Appropriate Inquiries (AAI) and may be used to comply with the provisions of the rule.

This Phase I included a visual inspection of the subject site on November 10, 2016; a review of Town directories, Sanborn Historical Atlases, research of public records; a review of updated Federal, State and Local databases and files pertaining to the site and nearby properties.

The purpose of the Phase I Assessment is to identify, to the extent feasible, pursuant to the processes prescribed by ASTM E1527-13, *recognized environmental conditions* in connection with the property. R*ecognized Environmental Conditions* are defined as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions.

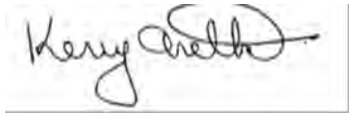

### 1.2. SCOPE OF SERVICES

Kerry Asetta and Daniel Jaffe ("Environmental Professional") meet the definition of Environmental Professional as defined in §312.10(b), and have performed the following "Environmental Investigation" in conformance with the scope and limitations set forth in the *American Society for Testing and Materials* (ASTM) Practice E-1527-13 "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process" for the aforementioned property, with any exceptions noted in the report. As previously stated, the USEPA has established that the revised ASTM E1527-13 Standard is consistent with the requirements of the final rule for All Appropriate Inquiry and may be used to comply with the provisions of the rule.

The four components utilized in this Phase I Environmental Site Assessment to identity Recognized Environmental Conditions include a Records Review; Site Reconnaissance; Interviews with current and/or past site owners, operators, and occupants of the property and local government officials; and an evaluation of the information.

There were no significant "datagaps" as defined by ASTM E-1527-13 that would affect the ability of the Environmental Professionals to identify Recognized Environmental Conditions at the site.

The Environmental Professionals that conducted this Phase I Environmental Site Assessment declare, that to the best of our professional knowledge and belief, we meet the definition of Environmental Professionals as defined in §312.10 of 40 CFT §312. We also have specific qualifications based on educations, training and experience to assess a property of the nature, history and setting of the subject property. We have developed and performed the All Appropriate Inquiry in conformance with the standards and practices set forth in 40 CFR Part 312.

Kerry Asetta
Name of Environmental Professional Signature

## SECTION 2.0
## SITE DESCRIPTION/SITE RECONNAISSANCE

### 2.1. Site Location and Legal Description

| | |
|---|---|
| **Site Address**: | 34 Dudley Street<br>Arlington, MA |
| **County:** | Middlesex |
| **Site Owner:** | Dudley Street Trust<br>34 Dudley Street<br>Arlington, MA 02476 |
| **Parcel ID:** | 55-2-39B |
| **Site Area:** | 0.767 acres |
| **Property Use:** | Commercial |
| **USGS Topographic Quadrangle:** | Lexington, MA |

### 2.2 Site & Vicinity Characteristics

The site consists of one, irregular-shaped parcel of land located at 34 Dudley Street in the Town of Arlington, MA. The site is located in a mixed residential and commercial area of Arlington. Nearby surface water includes Mill Brook, which abuts the site to the south.

According to the USGS Lexington, MA Quadrangle Map, the site is situated approximately 80 feet above mean sea level, as shown in **Figure 1, Attachment "A**" of this Report. The site is also identified by the Town of Arlington Assessors Department as Parcel ID# 55-2-39B, as shown in **Figure 2, Attachment "A"**.

The subject site is currently occupied by two commercial buildings, which consists of a one-story, concrete-block and vinyl-sided structure; and a one-story, wooden structure. The on-site structures currently contain four commercial occupants, which include an automobile body repair shop (Dudley Street Auto Body); a glass company (Arlington Glass); a construction company (McDonald Construction); and an automobile repair shop (Kenny Walsh).

The on-site structures are currently heated with natural gas and/or electricity; and are serviced with municipal water and sewer.

## 2.3 Exterior Observations

According to Arlington Assessor's Department records, the site contains a total area of 0.767 cares of land. The exterior portions of the site are asphalt-paved and utilized for parking and building access. Items noted on the exterior portions of the site included automobile eparts, trash dumpsters, and ladders.

Finally, there was no evidence of any 55-gallon drums, ASTs, existing USTs, surface water, or stressed vegetation, noted on the exterior portions of the site.

## 2.4 Interior Observations

According to Town of Arlington Assessor's Department records, the main on-site building was constructed in 1940 and contains 10,721 square feet of interior space. The construction year of the other on-site structure was not determined.

The interior inspection of the main on-site structure revealed it currently contaisn three tenants (Dudley Street Auto Body, Arlington Glass, and Kenny Walsh Auto Repair). This building contains offices, several garage bays, and a paint booth. Oil and/or hazardous materials noted within this structure included two, 55-gallon drums conaining waste paint and thinner; an 18-gallon waste oil caddy; and numerous small containers (up to 1 gallon each) of paint and various automobile-related fluids. These containers were noted to be in good condition, with no leaks or spills. However, it is noted that paint staining was noted in various areas throughout the "Dudley Auto Body" unit. Several above ground vehicle lifts were noted within this building. Several, gas-fired, ceiling-mounted heaters were observed throughout this building. The flooring consists of poured concrete,w ith no floor drains or other discharge points noted on the visible portions of the flooring.

The interior inspection of the on-site wooden structure located on the southwesterly portion of the site revealed it is currently utilized for office and storage space by "McDonald Construction". Items noted in this structure cosnisted of various building supplies. No oil and/or hazardous materials were observed within this building. In addition, no floor drains or other discharge points were noted on the visible portions of the flooring within this structure.

## 2.5 Current Use of the Property

The site is currently occupied by four commercial tenants, which include an automobile body repair shop (Dudley Street Auto Body); a construction company (McDonald Construction); a glass company (Arlington Glass); and an automobile repair shop (Kenny Walsh).

## 2.6 Past Uses of the Property

According to the site owner, Ms. Charlene Hasan, "Dudley Street Auto Body" and "Arlington Glass" have both operated at the site for over 30 years' and "McDonald Construction" has operated at the site for approximately one year. Ms. Hasan stated that past occupants of the site included "Executive Plumbing", "Churchill Management", and "Fitzsimmons Construction".

A review of Sanborn Atlases dated 1922, 1923, 1927, 1951, and 1973. Due to the poor resolution of the map, the use of the building at the subject site in 1973 could not be determined. Prior to that time, in 1922, 1923, and 1927, the southerly portion of the site was occupied by "Arlington Wet Wash Laundry"; and in 1951 by "B.L Cummings Local Milk". In addition, the northerly portion of the site contained a dwelling in 1922, 1923, 1927, and 1951. Please see **Attachment "F"** for copies of Sanborn Atlases.

According to a previous report prepared for the site by IES in 2000, the site was occupied by "Dudley Street Auto Sales", "Dudley Street Auto Body", and "Arlington Glass" since the early 1980's. Prior to the 1980's, the site was used for the storage and repair of taxi cabs since 1970. Prior to the 1970's, the northern portion of the site contained a residential dwelling, which was razed in 1970; and the southern portion of the site was occupied by a milk plant (B.L. Cummings), which was constructed in 1932. Prior to the 1930's, the southern portion of the site contained a laundry (Arlington Wet Wash Laundry).

## 2.7 Current Uses of Adjoining Properties and the Surrounding Area

The site is located in a mixed residential and commercial area in the Town of Arlington, MA. The site is adjoined to the north by Dudley Street; to the east by an office building located at 26 Dudley Street; to the south by Mill Brook; and to the west by a multi-tenant commercial building at 36 Dudley Street. The area further to the north, across Dudley Street, is occupied by residential dwellings located at 29, 33-35, and 37 Dudley Street and an automobile repair garage (A1 Automotive) located at 39 Dudley Street. The westerly abutting commercial building at 36 Dudley Street is currently occupied by "Bruce'0s Tire and Auto Service", "Summer Street Auto Care", and "McDemottre Auto Sales". The area further south of the site, past Mill Brook, is occupied by a park (Wellington Park Playground).

There were no existing tank farms, gasoline stations, commercial printers, or dry cleaners, identified in the immediate vicinity of the subject site.

## 2.8 Past Uses of Adjoining Properties and the Surrounding Area

A review of Sanborn Historical Atlases revealed in 1973, the area to the south of the site contained Mill Brook and Wellington Park; and the usage of the remainder of the surrounding area could not be determined due to poor resolution of this map. Further, in 1922, 1923, 1927, and 1951, the site was adjoined by dwellings, with the exception of Mill Brook to the south.

## SECTION 3.0
## USER/OWNER & MUNICIPAL INFORMATION

### 3.1 Title/Ownership Records

According to Arlington Assessor's Department records, the site is currently owned by Dudley Street Trust (Book: 14589, Page: 548).

No additional previous ownership information was available at this time since a Title Search was not supplied to IES.

### 3.2 Review of Environmental Liens and Activity & Use Limitations (AUL's)

To meet the requirements of 40 CFR 312.20 and 312.25, a search for the existence of environmental liens and Activity & Use Limitations (AUL's) that are filed or recorded against the property was conducted as part of this investigation.

According to "FirstSearch" report, which was prepared for the site and surrounding area by Environmental Data Resources, Inc. (EDR) of Milford, CT (updated to June 28, 2016), the subject site is not listed as the location of a Disposal Site with a Class A-3, Class A-4, Class B-2, or Class B-3 Response Action Outcome (RAO) Statement; or as the location of a Permanent Solution or Temporary Solution with Conditions. Therefore, there are no Activity & Use Limitations (AUL's) present at the site.

### 3.3 Specialized Knowledge

No additional specialized knowledge or experience related to the property or nearby properties was supplied to IES, such as information obtained from individuals involved in the same line of business as the current or former occupants of the property or an adjoining property, who may have specialized knowledge of the chemicals and processes used by this type of business.

### 3.4 Valuation Reduction for Environmental Issues

Ms. Charlene Hasan, the site owner stated that he is not aware of any current or past environmental issues associated with the site.

### 3.5 Commonly Known or Reasonably Ascertainable Information

No information regarding the site was obtained from sources other than those described in subsequent sections of this report involving commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases.

Specifically, information regard past uses of the property, specific chemicals that are present or once were present at the property, information on spills or other chemical releases that have taken place at

the property, and information regarding environmental cleanups that have taken place at the property are all included in other sections of this report.

## 3.6 Owner, Property Manager, Occupant Information

### 3.6.1 Interview With Owner

Ms. Charlene Hasan, the site owner, was interviewed during the site visit. According to Ms. Hasan, her family has owned the subject site for 35 years. Ms. Hasan, stated that a 10,000-gallon UST was removed from the subject site in the past. Ms. Hasan stated that she is not aware of any existing USTs at the site. Further, Mr. Hasan noted that the site buildings are heated with electricity and/or natural gas and are serviced with municipal water and sewer. Ms. Hasan noted that past occupants of the site include "Fitzsimmons Construction", "Executive Plumbing", and "Churchill Management".

### 3.6.2 Interview With Site Manager

Ms. Hasan is also identified as the Site Manager.

### 3.6.3 Interview With Occupants

An employee of "Kenny Walsh Auto Repair" stated that the waste oil generated at his business is transported to a nearby business, which utilizes it in a waste oil burner. The employee stated that there are no in-ground hydraulic lifts in his shop.

## 3.7 Interviews With Local Government Officials

As detailed in the following Section 4 of this report, IES contacted the Town of Arlington Fire Department, Building Department, Assessor's Department, Water & Sewer Department, Health Department, and Town Clerk's Office, in order to obtain information pertaining to the site.

## 3.8 Interviews with Others

No other persons were interviewed as part of this investigation.

# SECTION 4.0
# RECORDS REVIEW

## 4.1 Standard Environmental Sources – Federal Records

### 4.1.1 National Priority List Sites

The EPA's National Priority List (NPL) for the State of Massachusetts (updated to March 7, 2016) was reviewed for nearby EPA investigations. This research revealed that the site is not listed on the NPL databases and there are no NPL listed properties identified within a 1.0-mile radius of the subject site. In addition, there were no Federal Delisted NPL sites identified within a 0.5 mile radius of the subject site.

### 4.1.2 CERCLIS Listings

The CERCLIS database/Superfund Enterprise Management System (SEMS) Archive updated to March 7, 2016 by the USEPA was reviewed for nearby EPA investigations. This research revealed that the site is not listed on the CERCLIS/SEMS database. Additionally, there are no CERCLIS/SEMS listed properties identified within 0.5 miles of the subject site.

Finally, it is noted that the subject site is not included on the Federal Institutional Control/ Engineering Control (IC/EC) registries (updated to May 9, 2016).

### 4.1.3 RCRA CORRACTS Facilities; RCRA non-CORRACTS TSD Facilities (updated to June 27, 2016)

The subject site is not listed as a RCRA CORRACTS facility or a RCRA Non-CORRACTS TSD facility. Additionally, there are no RCRA CORRACTS facilities documented within 1.0 miles of the subject site. Further, there are no RCRA TSD facilities identified within 0.5 miles of the subject site.

### 4.1.4 RCRA Generators (updated to June 21, 2016)

The subject site is identified as the location of a RCRA generator (MAD037686433). Additionally, there are ten (10) other RCRA Licensed Hazardous Waste Generators identified within a 0.25-mile radius of the subject site. The RCRA Generators identified within 0.15 miles of the site are summarized in the following Table 1:

**Table 1**
**Summary of Nearby RCRA Generators**

| Name/Address | Facility ID/Status | Distance/Direction |
|---|---|---|
| **Ken's Auto Repair/ 34 Dudley Street** | **MAD037686433/ NLR** | **Subject Site** |
| Oxbow Partners/ 23 Dudley Street | MV7818927521/ VQG | 0.05 miles/ Northeast |
| Arlington Auto Body and Brake/ 14 Dudley Court | MAD066583188/ VSQG/CESQG | 0.06 miles/ East |
| Wilfert Brothers Woodworking/ 22 Prentiss Road | MAD001039411/ NLR | 0.06 miles/ South-Southwest |
| Dudley Fuel Company/ 9 Dudley Street | MAD038332714/ VSQG/NLR | 0.07 miles/ West |
| Arlington DPW/ 51 Grove Street | MV6176461000/ VSQG | 0.11 miles/ East |
| N/A/ 51 Grove Street | MAC30005824/ NLR | 0.11 miles/ East |
| Mirak Lincoln Mercury Nissan/ 956 Massachusetts Avenue | MAD152164679/ NLR | 0.14 miles/ South-Southwest |
| Coleman Road/ 956 Massachusetts Avenue | MAD152164679/ LQG | 0.14 miles/ South-Southwest |
| Gil's Auto Body/ 960 Massachusetts Avenue | MAD062166707/ VSQG/CESQG | 0.14 miles/ South-Southwest |
| Arlington Shell/ 934 Massachusetts Avenue | MV7816437722/ SQG | 0.15 miles/ South |

**Notes**: CESQG = Conditionally Exempt Small Quantity Generator
NLR = No Longer Regulated
VSQG/VQG = Very Small Quantity Generator
SQG = Small Quantity Generator

According to the EDR FirstSearch Report, the subject site is listed as the location of a former RCRA Generator (Ken's Auto Repair-MAD037686433), which is "No Longer Regulated" (NLR). This business generated waste solvents including Toluene, Xylene, Acetone, Methanol, Methyl Ethyl Ketone (MEK), and Benzene. There are no documented violations associated with this on-site RCRA Generator. The listing of the site as a former RCRA Generator is considered a potential on-site environmental threat.

In addition, due to the proximity, the RCRA Generators at 23 Dudley Street (MV7818927521), 14 Dudley Court (MAD066583188), 22 Prentiss Road (MAD001039411), and 9 Dudley Street (MAD038332714) are considered potential off-site environmental threats.

Further, due to the distance ($\geq$0.11 miles), the remaining RCRA generators identified in Table 1 are not considered significant off-site environmental threats at this time.

Further, due to the distance (>0.15 miles), the remaining RCRA Generators identified within 0.25 miles of the site are also not considered significant off-site environmental threats.

### 4.1.5 ERNS Sites (updated to March 28, 2016)

The subject site is not listed on the "Emergency Response Notification System" (ERNS) database. In addition, there are no ERNS listings identified less than 0.10 miles from the site.

## 4.2 Standard Environmental Sources – State Records

### 4.2.1 State Listed Sites (updated to June 28, 2016)

A review of State Hazardous Waste Sites (SHWS) was performed regarding releases of oil and hazardous materials that have been reported to the Massachusetts Department of Environmental Protection (MADEP).

The subject site is not listed as a DEP Disposal Site. However, there are twenty-nine (29) DEP Disposal Sites identified within 0.5 miles of the site. The Disposal Sites identified within 0.15 miles of the site are summarized in the following Table 2:

**Table 2**
**Summary of Nearby Disposal Sites**

| Name/ Address | RTN # | Status | Distance/ Direction |
|---|---|---|---|
| N/A/ 29 Dudley Street | 3-18101 | RAO | Adjoining/ North-Northeast |
| Property/ 971-977 Mass. Avenue | 3-0883 | PENNFA | 0.10 miles/ Southwest |
| Arlington DPW/ 51 Grove Street | 3-24242 | RAONR | 0.11 miles/ East |
| | 3-18405 | RAONR | |
| | 3-19754 | RAO | |
| Adjacent to 53 Grove Street/ Grove Street | 3-27866 | URAM | 0.13 miles/ East-Northeast |
| Intersection Mass. Ave. and Grove Street/ 931 Massachusetts Avenue | 3-31564 | RAO | 0.13 miles/ South |
| Coleman Road/ 956 Massachusetts Avenue | 3-17460 | RAO | 0.14 miles/ South-Southwest |

RAO = Response Action Outcome statement received by DEP
URAM = Utility Related Abatement Measure
RAONR = RAO Not Required. Linked to another Release Tracking Number (RTN)
PENNFA = Pending No Further Action

Due to the proximity of the DEP Disposal Site identified at 29 Dudley Street (RTN 3-18101), pertinent regulatory files and/or records associated with this listing were reviewed at the DEP's Northeast Regional Office, in order to obtain sufficient information in determining if a Recognized Environmental Condition, Historical Recognized Environmental Condition, Controlled Environmental Condition, or a de minimis condition exists at the property in connection with this listing.

**RTN 3-18101: 29 Dudley Street, Arlington, MA**

A "Response Action Outcome Statement" dated November of 1999 by Phoenix Environmental Services, Inc. of Bedford, Ma was obtained from the DEP relative to this nearby DEP Site. According to the Phoenix report, a release of #2 fuel oil from an AST occurred in the basement of the residence at this property in 1998. A Release Abatement Measure (RAM) was performed utilizing bioremediation to reduce the contaminants. In addition, 7.84 tons of oil-contaminated soil was excavated and removed from the property. Phoenix stated that the residual contamination levels are "well within the respective Cleanup Standards". Phoenix concluded that a Class A-2 RAO is applicable for this release. Due to the RAO status, this nearby DEP Site is not considered a REC at this time.

Due to the distance ($\geq$0.10 miles), the remaining DEP Sites listed in Table 2 are not considered RECs or significant off-site environmental threats at this time.

Further, due to the distance (>0.15 miles), the remaining DEP Sites identified within 0.5 miles of the site are not considered RECs.

Finally, there are no "Priority" Tier 1A sites located within a 1.0-mile radius of the subject site.

### 4.2.2 Leaking Underground Storage Tanks (updated to June 28, 2016)

Environmental Data Resources (EDR) "FirstSearch Report" provides a list of "Leaking Underground Storage Tanks" (LUST), since Massachusetts does not have a LUST list. A spill is included in the LUST list if it originated from an underground storage tank.

The subject site is not listed as the location of a LUST or LAST Site. However, there are seventeen (7) UST-related spills and four (4) AST-related spill identified within a 0.5 mile radius of the site. There are no AST-related releases identified within 0.15 miles of the site and the UST-related releases identified within 0.20 miles of the site are summarized in the following Table 3:

**Table 3**
**Summary of Nearby UST-Related Releases**

| Name/ Address | ID#/ Status | Distance/ Direction |
|---|---|---|
| Dudley Fuel Company/ 9 Dudley Street | 3-17565/ RAO | 0.07 miles/ West |
| | 3-17599/ RAONR | |
| ES Johnson Construction Co./ 50 Grove Street | 3-4317/ RAO | 0.10 miles/ East |
| | 3-11771/ RAO | |
| Arlington DPW/ 51 Grove Street | 3-4241/ REMOPS | 0.11 miles/ East |
| Arlington Shell/ 934 Massachusetts Avenue | 3-2768/ RAO | 0.15 miles/ South |
| | 3-29531/ RAO | |
| RAO = Response Action Outcome statement received by DEP<br>RAONR = RAO Not Required. Linked to another Release Tracking Number<br>REMOPS = Remedy Operating Status | | |

Due to the proximity of the LUST listings at 9 Dudley Street (RTNs 3-17565 and 3-17599), pertinent regulatory files and/or records associated with this listing were reviewed at the DEP's Northeast Regional Office, in order to obtain sufficient information in determining if a Recognized Environmental Condition, Historical Recognized Environmental Condition, Controlled Environmental Condition, or a de minimis condition exists at the property in connection with this listing.

**RTN's 3-17565 and 3-17599: 9 Dudley Street, Arlington, MA**

According to DEP records, RTN 3-17599 has been linked to RTN 3-17565 for which a Class A-2 RAO was received by the DEP in 2002. IES obtained a copy of an "Immediate Response Action Completion and Response Action Outcome Statement" dated January 22, 2002 by Cyn Environmental Services of Stoughton, MA relative to these LUST listings. Cyn stated that groundwater at this property flows to the south, which is away from the subject site. During the removal of eight USTs at this site in 1998, PID readings in excess of 100 ppm were identified in the excavation, which triggered a 72-hour reportable condition. Cyn concluded that although the oil and hazardous material in the environment was not reduced to background, a "Permanent Solution was achieved". Further, Cyn stated that a "Class A-2 RAO has been achieved and no further action is required". Due to the RAO status, these nearby LUST listings are not considered RECs.

Due to the distance (≥0.10 miles), the remaining LUST Sites listed in Table 3 are also not considered RECs or significant off-site environmental threats at this time.

Finally, due to the distance (>0.20 miles), the remaining LUST and LAST Sites identified within 0.5 miles of the site are not considered significant off-site environmental threats.

### 4.2.3 Spills List

The subject site is not listed as the location of a DEP Spill/Release. However, there are forty (40) pre-MCP listed Spills/Releases documented within 0.5 miles of the subject site. The pre-MCP Spills identified within 0.10 miles of the site are summarized in the following Table 4:

**Table 4**
**Summary of Nearby pre-MCP DEP Spills**

| ID# | Name/ Address | Material/ Quantity | Location |
|---|---|---|---|
| N87-0929 | N/A/ 975 Massachusetts Avenue | Unknown/ None | 0.10 miles/ Southwest |
| N92-0142 | Brattle Realty Trust/ 50 Grove Street | Gasoline/ Unknown | 0.10 miles/ East |
| N87-0847 | N/A/ 971-977 Mass. Ave. | Unspecified/ Unspecified | 0.10 miles/ Southwest |
| N87-1479 | Vacant Lot/ 971-977 Mass. Ave. | Misc. Oil/ 251-500 Gallons | |
| N88-0141 | N/A/ 971 Mass. Ave. | Lacquer Thinner/ 51-100 Gallons | |

Due to the distance (0.10 miles), "closed" status, and amount of time that has elapsed (at least 24 years), the DEP Spills listed in Table 4 are not considered significant off-site environmental threats.

In addition, due to the distance (≥0.11 miles), the remaining DEP Spills identified within 0.5 miles of the site are also not considered significant off-site environmental threats.

### 4.2.4 Solid Waste/Landfill Facilities - within 0.5 miles (updated to January 31, 2016)

A review of the Active Solid Waste Landfill List (Updated to January 31, 2016) for Massachusetts revealed that there are no SWL Facilities located within 0.5 miles of the subject site. However, there is a Transfer Station (Arlington DPW) located at 51 Grove Street (ID# TR 0010.007), which is located approximately 0.11 miles east of the subject site. According to the EDR FirstSearch Report, this Transfer Station closed in 1993.

### 4.2.5 Registered Underground Storage Tanks (updated to August 22, 2016)

A review of the Massachusetts State Registered Underground Storage Tank list (updated to August 22, 2016) revealed that the subject site is not listed. However, there are seven (7) facilities identified within 0.25 miles of the site. The UST facilities identified within 0.10 miles of the site are summarized in the following Table 5:

**Table 5**
**Summary of Nearby UST Facilities**

| Name/ Address | Capacity/ Contents | Status | Distance/ Direction |
|---|---|---|---|
| Wilfred Brothers Woodworking/ 22 Prentiss Road | (2) 2,500/ Gasoline | Removed | 0.06 miles/ South-Southwest |
| Dudley Fuel Company/ 9 Dudley Street | (9) 1,000-20,000/ Gasoline, heating Oil, Kerosene, Diesel | Removed | 0.07 miles/ West |
| ES Johnson Construction Co./ 50 Grove Street | 2,000/ Gasoline | Removed | 0.10 miles/ East |

Due to the proximity, the UST facility identified at 22 Prentiss Road is considered a potential off-site environmental threat.

Due to the removed status of the USTs and the "RAO" status of contamination associated with the former USTs, the UST facility at 9 Dudley Street is not considered a significant off-site environmental threat at this time.

Due to the distance (≥0.10 miles), the remaining UST facilities identified within 0.25 miles of the site are not considered significant off-site environmental concerns at this time.

Additional information regarding USTs at the site and surrounding area is included in section 4.3.1 of the report.

### 4.2.6 Institutional Control & Engineering Control Registries (updated to May 9, 2016)

According to "FirstSearch" report, which was prepared for the site and surrounding area by Environmental Data Resources, Inc. (EDR) of Milford, CT, the subject site is not listed as the location of an Institutional Control (i.e. Activity & Use Limitation).

Further, according to the a "FirstSearch" report, which was prepared for the site and surrounding area by Environmental Data Resources (EDR), the subject site is not listed as the location of a Disposal Site with a Class A-4 or Class B-3 Response Action Outcome (RAO) Statement; or as the location of a Permanent Solution or Temporary Solution with Conditions. Therefore, there are no "Engineered Controls" present at the site.

### 4.2.7 Federal/State Brownfield Sites (updated to June 21, 2015 and December 31, 2015)

The subject site is not included on either the Federal or State Brownfield list, and there are no Federal or listed Brownfield Sites identified within 0.5 miles of the subject site. In addition, there are no, Federal or State Brownfield Sites documented within 0.5 miles of the site.

### 4.2.8 State and Tribal Voluntary Cleanup Sites (updated to July 27, 2015)

There were no State or Tribal Voluntary Cleanup Sites identified within a 0.5 mile radius of the subject site.

### 4.2.9 Historic Auto Stations and Cleaners Database (updated to February 20, 2007)

A review of EDR's list of Historic Auto Stations and Historic Cleaners indicated that the site is listed as the location of a Historic Auto Station. Between 1999 and 2012, several automobile repair businesses operated at the site, which included "A1 Automotive Repair", "Dudley Street Auto Body", and "Dudley Street Auto Sales".

## 4.3 Additional Environmental Record Sources

### 4.3.1 Town of Arlington Fire Department & Town Clerk's Office

Records regarding the storage of oil and hazardous materials at the site were requested from the Office of Fire Prevention, Arlington Fire Department. This review revealed two permits dated 2000 were issued for the removal of a 275 gallon waste oil tank and a 10,000-gallon fuel oil UST. These records indicate the 10,000 gallon fuel oil UST was located "in back parking lot". There were no records available relative to any confirmatory soils sampling done during the tanks removals. Please see **"Attachment D"** for copies of Fire Department records.

A review of records at the Arlington Clerk's Office revealed there are no records of any USTs on file for the subject site.

### 4.3.2 Arlington Health Department

The Town of Arlington Health Department records were requested for incidents at the site. According to Ms. Laura Munsey of the Arlington Health Department, the only record on file relative to the subject site is an Order of Conditions dated September of 1988 associated with the abutting wetlands.

### 4.3.3 Arlington Water and Sewer Department

The Town of Arlington Water District was contacted relative to municipal drinking water supplies at the site. The subject site is connected to the municipal water and sewer systems. The Town of Arlington receives its drinking through the Massachusetts Water Resources Authority (MWRA), which is supplied by the Quabbin and Wachusett Reservoirs.

### 4.3.4 Arlington Building Department & Assessor's Office

A review of records on file at the Arlington Building Department was performed as part of this assessment. This review revealed several permits on file for the site associated with building a foundation, installing garage doors, and a modular office.

A review of Arlington Assessor's Department records revealed the site is currently owned by Dudley Street Trust (Book: 14589, Page: 548). These records also revealed the main site building was constructed in 1940 and contains 10,721 square feet of interior space. Further, these records indicate the site building was heated with "oil" in the past.

### 4.3.5 Arlington Conservation Commission

The Arlington Conservation Commission was not contacted as part of this assessment.

### 4.3.6 Previous Environmental Reports

IES, Inc. previously completed a "Preliminary Site Assessment" dated July 21, 2000 (IES Project # 400-124) for the subject site. At the time of the 2000 IES investigation, the site was occupied by "Dudley Street Auto Body", "Arlington Glass", "Arlington Home and Building", and "Dudley Street Auto Sales". In the past, IES stated that the site was occupied by a taxi cab storage and repair business, a residence, a milk plant, and a laundry. According to the 2000 IES report, municipal records indicate the presence of a 10,000 gallon gasoline UST; a 1,500-gallon fuel oil UST; and a 500-gallon waste oil UST at the site, which were installed in 1970. IES noted that "no documentation regarding the removal of these tanks was on file with Arlington town offices". Potential off-site environmental threats identified in the 2000 IES report included an abutting automotive repair facility and former fuel oil terminal at 36 Dudley Street. Additional off-site environmental concerns included another nearby fuel storage terminal located at 9 Dudley Street Place, which was listed as the location of two UST-related spills (RTNs 3-17565 and 3-17599). Further, underground storage tanks documented at 26 and 39 Dudley Street were also noted as potential off-site environmental threats. The 2000 IES report recommended performing a Ground Penetrating Radar (GPR) Survey

to determine if any USTs were still present at the site; and performing a subsurface investigation to "determine the environmental status of the site".

# SECTION 5.0
# SUBSURFACE INVESTIGATION

## 5.1 Site Geology/Hydrology

The site's geology and hydrology were not determined during this investigation.

## 5.2 Soil Sampling And Analysis

No soil samples were collected as part of this assessment.

## 5.3 Groundwater Sampling And Analysis

No groundwater samples were collected as part of this assessment.

## 5.4 Vapor Migration

Due to the absence of any known VOCs contamination at the site; and the absence of a basement within the site buildings, the potential for vapor migration is not considered a significant concern at the site at this time. However, it is noted that absence of a vapor migration cannot be conclusively determined without additional testing.

# SECTION 6.0
# FINDINGS & CONCLUSIONS

## 6.1 Summary of Findings

This Phase I Environmental Site Assessment consisted of a historical review, a site inspection, research of State and local files, as depicted in Sections 1 through 5 of this report.

The site consists of one, 0.767-acre, irregular-shaped parcel of land located at 34 Dudley Street in a mixed residential and commercial area of the Town of Arlington, MA. The subject site is currently occupied by two commercial buildings, which include a one-story, concrete-block and vinyl-sided structure and a one-story, wooden garage. The on-site structures currently contain four commercial occupants, which include an automobile body repair shop (Dudley Street Auto Body); a glass company (Arlington Glass); a construction company (McDonald Construction); and an automobile repair shop (Kenny Walsh).

The on-site structures were built around 1940 and 1982; are currently heated with natural gas and/or electricity; and are serviced with municipal water and sewer. In the past, the site building was heated with fuel oil, as indicated in Arlington Assessor's records.

The site was occupied by "Dudley Street Auto Sales", "Dudley Street Auto Body", and "Arlington Glass" since the early 1980's. Prior to the 1980's, the site was used for the storage and repair of taxi cabs since 1970. Prior to the 1970's, the northern portion of the site contained a residential dwelling, which was razed in 1970; and the southern portion of the site was occupied by a milk plant (B.L. Cummings), which was constructed in 1932. Prior to the 1930's, the southern portion of the site contained a laundry (Arlington Wet Wash Laundry).

According to a 2000 IES report previously prepared for the site, municipal records indicate the presence of a 10,000 gallon gasoline UST; a 1,500-gallon fuel oil UST; and a 500-gallon waste oil UST at the site, which were installed in 1970. IES noted that "no documentation regarding the removal of these tanks was on file with Arlington town offices".

"Recognized Environmental Conditions" (REC's) identified during this assessment include the evidence of the presence of two existing USTs and one former UST at the site. According to the 2000 IES report, municipal records indicate the presence of a 10,000 gallon gasoline UST; a 1,500-gallon fuel oil UST; and a 500-gallon waste oil UST at the site, which were installed in 1970. A review of Arlington Fire Department records revealed the 10,000-gallon UST was removed in September of 2000. The Fire Department did not have any records of the removal of the other two USTs or of any confirmatory soil sampling performed during the 10,000-gallon UST removal.

No "Historical Recognized Environmental Conditions" (HRECs) or Controlled Recognized Environmental Conditions (CRECs) were identified during this assessment.

Potential on-site environmental threats include the use of the site for automobile repair and body work dating back to the 1980's; and the associated above ground storage of OHM in the site building. In

addition, the former use of the site as a taxi cab repair facility is also noted as a potential on-site environmental concern. In addition, the listing of a business at the site (Ken's Auto Repair) as a RCRA Generator (MAD037686433), which is "No Longer Regulated" (NLR) is also noted as a potential on-site environmental threat.

Potential off-site environmental threats identified during this assessment include the westerly and northerly abutting automobile repair facilities (Bruce's Tire and Auto Service, Summer Street Auto Care, and A1 Automotive) located at 36 and 39 Dudley Street. Additional potential off-site environmental threats include the nearby RCRA Generators at 23 Dudley Street (MV7818927521), 14 Dudley Court (MAD066583188), 22 Prentiss Road (MAD001039411), and 9 Dudley Street (MAD038332714); the UST facilities at 9 Dudley Street and 22 Prentiss Road; and the DEP listings at 29 Dudley Street (RTN 3-18101) and 9 Dudley Street (RTNs 3-17565 and 3-17599). However, mitigating factors include the RAO status of RTNs 3-18101, 3-17565, and 3-17599.

Further, please note that if any contamination is detected at the site that originates from an off-site source, the site owner has the option to file a "Downgradient Property Status Submittal" pursuant to 310 CMR 40.0180. According to 310 CMR 40.0184(1), "any person who establishes and maintains Downgradient Property Status....shall not be subject to the deadlines for Tier Classification and Comprehensive Response Actions" and applicable fees.

## 6.2 Conclusions & Opinion

"We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of 34 Dudley Street in Arlington, MA, the property. Any exceptions to, or deletions from, this practice are described in this report. This assessment has revealed evidence of a Recognized Environmental Condition (REC) in connection with the property.

Due to the aforementioned REC and potential on-site and potential off-site environmental threats, the subject site is considered a **"Moderate/High Environmental Risk"** (see **Attachment "AAA"**) regarding soil and/or groundwater contamination. In addition, it is our opinion that in accordance with IES's Cleanup Risk Rating, which is depicted in **"Attachment AA"**, IES would classify the site as a **"Moderate/High Cleanup Risk"** due to the absence of any removal documentation association with two USTs at the site and the absence of confirmatory soil sampling associated with the 10,000-gallon fuel oil UST that was removed from the site.

## 6.3. Recommendations for Further Investigation

It is the recommendation of IES, Inc. that a Ground Penetrating Radar (GPR) survey be performed at the site, in order to determine if the two USTs with no removal documentation are still present. The cost of a GPR survey is approximately $2,500.00 and can be completed in approximately 2 weeks. If any abandoned USTs are discovered during the GPR survey, a UST Removal program would be warranted.

In addition, if you desire to conclusively determine if the REC, and potential on-site and off-site sources of contamination have impacted the soil and/or groundwater at the site, a subsurface

investigation is recommended. This investigation should include the advancement of test borings, monitoring well installation, soil sample screening, and laboratory analysis of soil and/or groundwater samples. The cost of a Phase II Subsurface Investigation is estimated at approximately $9,000.00, and can be completed within 3-4 weeks.

## SECTION 7.0
## LIMITATIONS & CONDITIONS

1. The purpose of this Phase I Environmental Assessment Report is to address the likelihood of a release or threat of release of oil or hazardous materials at the subject site. The information obtained from sub-contractors, personal interviews, public records, and maps is subject to the personal recollection of those persons interviewed, and the availability and accuracy of the records on file with the State and municipal agencies. IES not be responsible for errors resulting from incorrect information provided by these sources.
2. This report was designed to assess the physical characteristics of the Site with regard to the likelihood of a release or threat of release of oil or hazardous materials and no attempt was made to investigate the regulatory compliance of the Site regarding Federal, State, or Local Laws and Regulations.
3. Our conclusions are based on the contents of this report and are a result of the interpretation of the existing data that was compiled.
4. If additional historical or analytical data becomes available, IES shall reserve the right to review this material to determine if the conclusions in this report are to be modified or updated.
5. IES has not made any attempt to definitively determine any impact that any release or threat of release, from the subject site, has on any surrounding properties nor has IES made any attempt to definitively determine any impact that any release or threat of release, from any surrounding properties, has on this subject site, therefore, if determination of said impacts are required by the Client, and in-depth subsurface exploration program must be undertaken and IES further recommends consultation with an attorney be initiated to determine the potential for liabilities.
6. Any laboratory analysis of samples collected by IES, at or beneath the site, was completed by independent laboratories. Unless otherwise noted in this Report, IES has accepted their data at face value without additional verification. No warranty the analytical results or procedures is expressed or implied by IES. Laboratory analyses are limited to those discussed in the report unless otherwise specified.
7. This Report is only a Phase I Environmental Site Assessment and additional work may be required, as defined in the Massachusetts Contingency Plan (MCP 310 CMR 40.0480), in order to complete a Phase I-Initial Site Investigation Report (Phase I Report), and should you desire to proceed with a Phase I Report, a more detailed description of this additional work will be forwarded to you in a subsequent Proposal.
8. The Report produced, in accordance with the aforementioned Scope of Work, is only a Phase I Environmental Site Assessment Report, and should this site exhibit a release, additional work may be required, as defined in the Massachusetts Contingency Plan (MCP 310 CMR 40.0480), in order to complete a Phase I-Initial Site Investigation Report (Phase I Report).
9. IES's completion of this project was performed in accordance with generally accepted practices of other consultants undertaking similar studies at the same time and in the same geographical area. IES observed a degree of care and skill generally exercised by other consultants under similar circumstances and conditions. IES's findings and conclusions must be considered not as scientific certainties, but rather as our professional opinion concerning the significance of the limited data gathered during the course of this project. No other warranty, expressed or implied, is made. IES does not and cannot represent that the sites does not contain any hazardous substances, contaminants, pollutants, petroleum hydrocarbons, or any other latent conditions beyond that observed by IES during the course of this Project. The conclusions presented in this Report were based solely upon

the services described therein, and not on scientific tasks or procedures beyond the scope of the described services or the time and budgetary constraints imposed by the Client.

## 1.0 Introduction

In accordance with your authorization, Sub-Surface Informational Surveys, Inc. (SIS) reports to you the results of the ground penetrating radar survey performed on December 2, 2016 at 34 Dudley Street Arlington, MA. This survey directed by your approval of SIS quotation #1.6314.16 dated November 16, 2016.

### 1.1 Purpose and Scope

The purpose of the ground penetrating radar survey was an investigation for the location of underground storage tanks within an area of 0.75 acres.

Above images show site map of GPR survey area provided by the IES of Massachusetts.

# GROUND PENETRATING RADAR (GPR)
# SURVEY RESULTS

## Geophysical Survey

Sub-Surface Informational Surveys Incorporated performed the geophysical survey. A transducer operator/supervising GPR technician performed the survey.

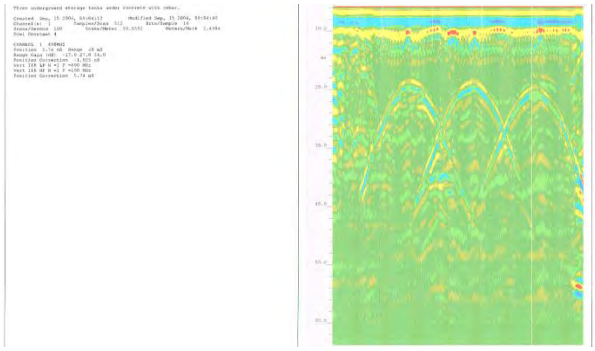

### 2.1 Geophysical Survey Procedures

The depth setting of the GPR survey was approximately 10.00' to locate any existing and unknown anomalies. An increase of high conductivity was located approximately 0.00' to 04.75' below the surface. The increase in conductivity is commonly caused by the capillary fringe of the water table, clays, silts, or organics. GPR traverses were conducted with a maximum of a 2.00' spacing to better conduct the GPR survey. Typically a 5.0' – 10.0' spacing is sufficient to detect all large capacity UST's (500-gallon or greater), septic systems and underground utilities with a high degree of certainty. The spacing of a maximum of 2.0' was implemented to better define any existing suspected anomalies. Traverses were conducted in both north/south and east/west directions to form a grid pattern. Traverses were conducted around all surface obstructions such as walls, curbs, vehicles, equipment, fence, dumpsters, etc... Anomalies detected in the GPR data common to possible suspect underground utilities and/or storage tanks were marked on the ground with paint on the day of the survey. All depths are approximate based on an estimation of the dielectric constants of the subsurface.

The following is an explanation of the equipment used during our survey:

1. The equipment used to conduct the geophysical survey included GPR equipment, which consists of **subsurface interface radar** (SIR-3000) computer manufactured by Geophysical Survey Systems, Inc., power supply, graphic recorder, video display unit, and transmitting/receiving antenna. The equipment is known collectively as a **GPR** system. The transmitting/receiving antenna transmits electromagnetic signals into the subsurface and then detects, amplifies and displays reflections of the signal on a graphic recorder and a video display unit. As the antenna is moved slowly across the ground surface or surface of contact, a radar image of the subsurface is produced. The maximum depth of penetration of the GPR signal and the resolution of the reflections are a function of the antenna frequency and the electrical properties of the subsurface. As electrical conductivity of the subsurface increases, GPR signal penetration decreases. GPR reflections are produced by spatial changes in the physical properties of the subsurface (I.e., type of material, presence of any subsurface fluid and porosity) and related changes in the electrical properties of the subsurface material in the path of the signals. The greater the difference in the subsurface structures the stronger the GPR reflection seen in the data.

Characteristics that are considered in the interpretation of the GPR data from a given site include the size, shape, and amplitude of the reflections. Metallic underground storage tanks (UST's), utilities and conduits have electrical properties uniquely different from those of the soils in which they are buried. As a result, the GPR reflections are usually of high amplitude and have distinctive shapes. For GPR profiles oriented perpendicular to the long axis of the tanks, the signature is similar to a hyperbola. The signature is also a function of the tank diameter.

# GROUND PENETRATING RADAR (GPR)
# SURVEY RESULTS

**SAMPLE PHOTO: above represents a sample of data collected by Sub-Surface Informational Surveys, Inc. on Sept. 15, 2004 at a site in the State of CT. It shows three (3) Underground Storage Tanks (UST's) with the centerline at the top of the parabolas. This data was taken through concrete, with rebar. NOTE: The above <u>is not</u> part of the data collected for this survey.**

2. **Pipehorn 500 Dual-Transmitter, Dual-Frequency Locator:** This unit has two separate transmitters. One operates at the highest frequency available in sweeping an area of tracing poor conductors such as iron pipes, fiber optic cable w/tracer tape. A second, low frequency transmitter enables us to quickly isolate a single conductor in congested areas, or to trace for a long distance. **NOT IMPLEMENTED**

3. **The Verifier G2:** This unit provides digital signal processing for a variety of applications. The unit offers Active, Passive and Beacon locating modes. The unit transmits via direct line connections, induction clamp or induces broadcast signals. An 80 kHz frequency facilitates locating metallic lines with insulators that weaken or block low frequencies. In passive mode, detects signals generated by 50/60 HZ power as well as radiated radio frequencies. **NOT IMPLEMENTED**

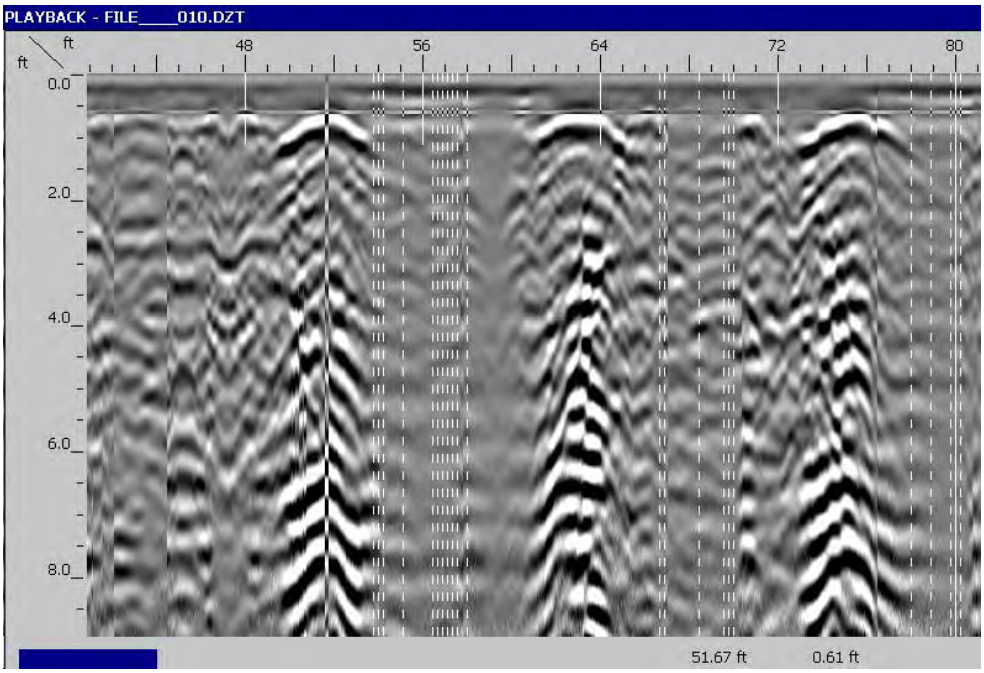

## 2.2 <u>Geophysical Survey Results</u>

A Ground Penetrating Radar (GPR) survey was conducted in specific asphalt, concrete, and stone covered areas adjacent the building located at 34 Dudley Court as directed by the IES of Massachusetts on site project manager for the location of underground storage tanks. Parabolic anomalies consistent with one (1) possible suspect underground storage tank (UST) were detected in the GPR data collected in the survey areas on the day of the survey. GPR anomalies consistent with possible suspect underground utilities were detected in the GPR data and marked on the ground with paint on the day of the survey..

Above photo shows survey area where GPR anomalies consistent with a possible suspect underground storage tank were detected in the GPR data. The location of these detected GPR anomalies and were marked on the ground with paint on the day of the survey.

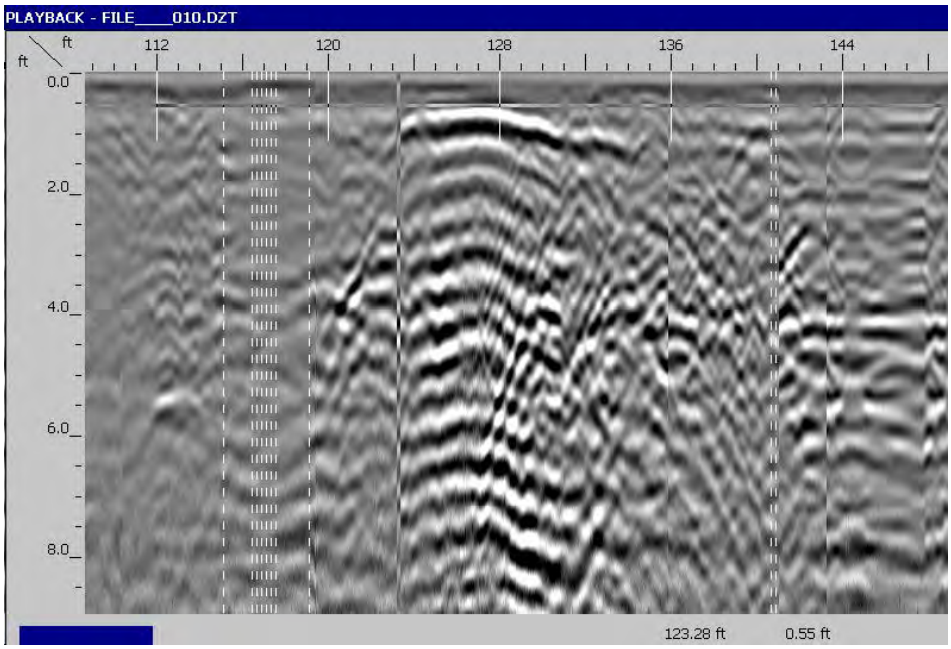

# GROUND PENETRATING RADAR (GPR)
# SURVEY RESULTS

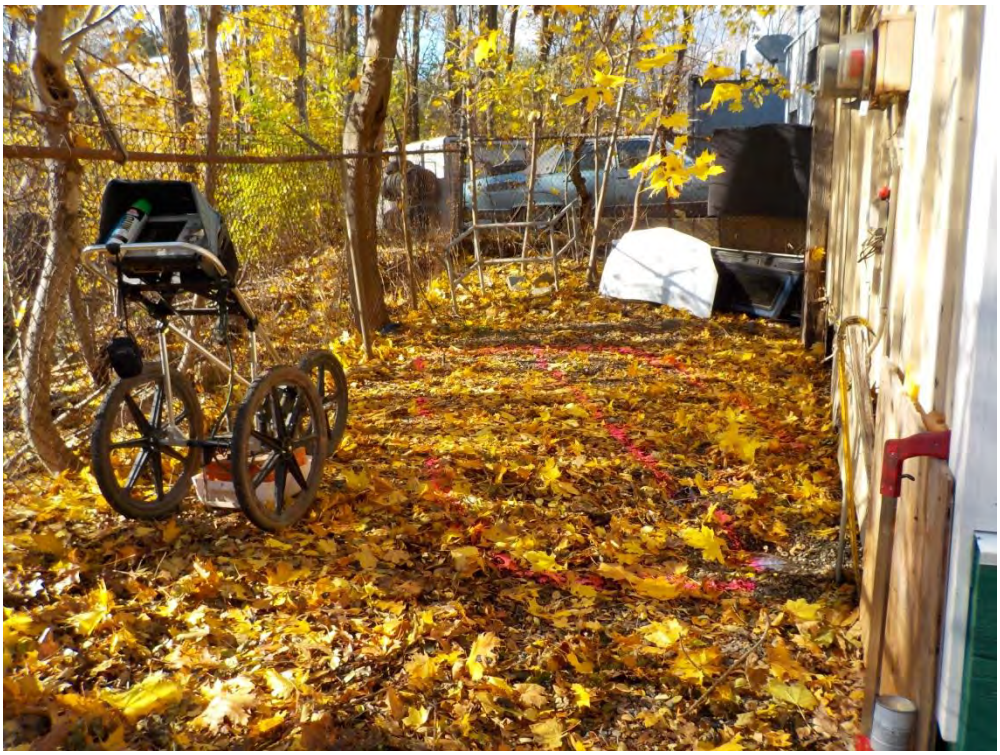

The above image represents GPR data collected in survey area pictured previously. GPR anomalies with similarities to a possible suspect underground void can be seen starting at 51.67' into the GPR data at an approximate depth of 00.61'. The locations of the anomalies were marked on the ground with paint on the day of the survey as seen below.

# GROUND PENETRATING RADAR (GPR)
# SURVEY RESULTS

The above image represents GPR data collected in survey area pictured previously. GPR anomalies with similarities to the long axis of a possible suspect underground storage tank can be seen starting at 123.28' into the GPR data at an approximate depth of 00.55'. The locations of the anomalies were marked on the ground with paint on the day of the survey as seen below.

# GROUND PENETRATING RADAR (GPR)
# SURVEY RESULTS

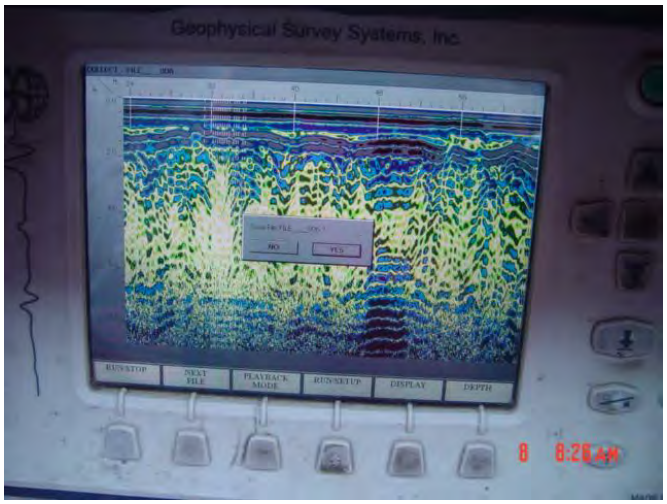

Above photo shows green paint marking location of detected suspect underground drainage utilities.

All survey results were reviewed with the IES of Massachusetts project manager on the day of the survey.

Re: IES Project # 2016-11-0825
UST Removal Assessment
34 Dudley Road
Arlington, MA

Dear Ms. Hasan,

As requested, and in accordance with the Terms of our Contract dated December 6, 2016, IES was on-site to observe the removal of one abandoned Underground Storage Tank (UST) located behind the garage building situated on the southwesterly corner of the site, and to collect confirmatory soil samples for laboratory analysis. This program was performed pursuant to the requirements detailed in Section 80.43 (Requirements for Removal and Permanent Closure-in-Place) of the DEP's "Underground Storage Tank Systems" document dated January 2, 2015 (310 CMR 80.00 and 527 CMR 1.00 § 66.21.7.4.3.4).

## A. INTRODUCTION

According to a "Phase I Environmental Site Assessment" report dated November 15, 2016, previously prepared by IES, Inc., a total of three USTs were documented at the subject site, which consisted of a 10,000-gallon gasoline UST; a 1,500-gallon fuel oil UST; and a 500-gallon waste oil UST. Arlington Fire Department records indicated the 10,000-gallon gasoline UST was removed in 2000. However, no records were available relative to the other two USTs.

In order to determine if the remaining two documented USTs were removed from the site, a Ground Penetrating Radar (GPR) survey was performed at the site by Subsurface Informational Surveys, Inc. of East Longmeadow, MA on December 2, 2016. The results of the GPR survey revealed that "parabolic anomalies consistent with one possible suspect underground storage tank were detected in the GPR data". No other parabolic anomalies consistent with USTs were identified at the site in the GPR survey area.

## B. UST CLOSURE

IES was on-site on December 20, 2016, to witness the removal of the suspect abandoned UST. Donadio Environmental Services of Braintree, MA and Global Contracting Services Inc. of Taunton, MA were contracted by the site owner, to perform the tank removal activities.

On December 20, 2016 Global Contracting unearthed the suspect UST, which was situated immediately to the south (behind) of the on-site garage building. Periodic soil sample screening utilizing a portable MiniRAE Lite photoionization detector (PID) to determine the presence of

Volatile Organic Compounds (VOC's) in the soil headspace of the overburden soil obtained from the UST excavations revealed no elevated headspace readings above background (0.0 ppmv).

The UST was cut open by Global, which revealed a very small amount of water was present in the bottom of the tank. Fire Inspector Kelly of the Arlington Fire Department was present to witness the removal of the UST. Mr. Kelly stated that a permit to remove the UST was not required due to the contents (water) of the tank. The tank was transported off-site by Global and disposed of at JW Grants in Hyde Park, MA. Please see **"Attachment "A"** for photographs of the UST removal activities.

After the tank was removed, soil samples were obtained pursuant to the requirements detailed in the DEP's "Underground Storage Tank Systems" document dated January 2, 2015.

An inspection of the UST excavation revealed no suspect soil staining or olfactory evidence of a petroleum release. A total of five soil samples were collected from the bottom and sidewalls of the excavation. The soil samples were screened in the field with a portable MiniRAE Lite photoionization detector (PID) to determine the presence of Volatile Organic Compounds (VOC's) in the soil headspace. The headspace screening results revealed no elevated headspace VOC readings in any of the soil samples collected from the excavation.

In order to confirm that a release had not occurred at the site above RCS-1 standards, one composite soil sample was forwarded to Phoenix Laboratories, Inc. of Manchester, CT for the testing of Volatile Petroleum Hydrocarbons (VPH) with target analytes and Extractable Petroleum Hydrocarbons (EPH) with Polycyclic Aromatic Hydrocarbons (PAHs). In addition, a sample of the liquid within the tank was also obtained and submitted for laboratory analysis of EPH, PAHs, and VPH with target analyses.

For the laboratory results, the chain-of custody, and laboratory certifications please see **Attachment "B"** at the end of this report. These activities were performed pursuant to the testing requirements detailed in the DEP's "Underground Storage Tank Systems" document dated January 2, 2015.

The results of the confirmatory soil testing revealed elevated levels of C11-C22 Aromatics (190 mg/kg) and several PAHs were identified in the composite soil samples that was tested, as detailed in the following Table 1:

**Table 1**

ND = Not Detected
**Bold** = Above RCS-1 Reportable Concentrations

As shown in Table 1, elevated levels of several PAHs were identified in the soil sample, at concentrations above the applicable RCS-1 Reportable Concentrations. However, due to the visual evidence of fill material in this soil sample, the sample was subsequently submitted to Microvision Laboratories of Chelmsford, MA for Coal Ash Microscopic analysis. This analysis detects and documents the presence of any coal, coal ash, asphalt, or wood ash that may be present in soil samples utilizing a combination of microscopy techniques including Polarized Light Microscopy (PLM) and Scanning Electron Microscopy with Energy Dispersive X-Ray Spectroscopy (SEM/EDS).

According to the Microvision report, two suspect particles were identified in the confirmatory soil sample. In regard to these particles, Microvision stated that the "PLM examination indicated the particle type to be consistent with coal ash"; and "the EDS Spectrum indicates this particle type is coal ash". Please see **"Attachment "B"** for a copy of the Microvision Laboratories report.

It should be noted that based on the DEP's May 2002 "Technical Update – Background Levels of Polycyclic Aromatic Hydrocarbons and Metals in Soil", it is the opinion of IES, pursuant to 310 CMR 40.0006, the elevated level of PAHs identified in the Urban Fill at the site are considered anthropogenic background. Anthropogenic Background is defined as "levels of oil and hazardous material that would exist in the absence of the disposal site of concern" and which are:

(a) attributable to atmospheric deposition of industrial process or engine emissions and are ubiquitous and consistently present in the environment at and in the vicinity of the disposal site of concern;
(b) attributable to Historic Fill;
(c) associated with sources specifically exempt from the definitions of disposal site or release as those terms are defined in MGL c. 21E and 310 CMR 40.0006;
(d) releases to groundwater from a public water supply system; or
(e) petroleum residues that are incidental to the normal operation of motor vehicles.

Historic Fill is defined as "Material that based on the weight of evidence and consistent with the Conceptual Site Model":

(a) was emplaced before January 1, 1983;
(b) may contain, but is not primarily composed of, construction and demolition debris, reworked soils, dredge spoils, coal ash, wood ash or other solid waste material;
(c) was contaminated with metals, hydrocarbons, and/or polycyclic aromatic hydrocarbons prior to emplacement, at concentrations consistent with the pervasive use and release of such materials prior to 1983;
(d) does not contain oil or hazardous materials originating from operations or activities at the location of emplacement;
(e) is not and does not contain a generated hazardous waste, other than Oil or Waste Oil;
(f) does not contain chemical production waste, manufacturing waste, or waste from processing of metal or mineral ores, residues, slag or tailings; and
(g) does not contain waste material disposed in a municipal solid waste dump, burning dump, landfill, waste lagoon or other waste disposal location.

Pursuant to 310 CMR 40.0317(9), "releases of oil and/or hazardous material related to coal, coal ash, or wood ash, excluding wood ash resulting from the combustion of lumber or wood products that have been treated with chemical preservatives" do not require notification. Therefore, it is the opinion of IES, Inc. that the release of PAHs identified in the soil at the site are exempt from DEP notification.

According to 310 CMR 40.0361(1)(a), the soil at the site is classified as Category RCS-1 for reporting purposes. This is due to the fact that the site is located at or within 500 feet of a residential dwelling, a residentially zoned property, school, playground, recreational areas or park.

In order to determine the type of material the small amount of liquid in the bottom of the UST, a sample of this liquid was forwarded to Phoenix Laboratories, Inc. of Manchester, CT for the testing of Volatile Petroleum Hydrocarbons (VPH) with target analytes and Extractable Petroleum Hydrocarbons (EPH) with Polycyclic Aromatic Hydrocarbons (PAHs).

The results of the testing of the UST contents revealed slightly elevated levels of Toluene and several PAHs were identified in the sample of liquid obtained from the UST. However, all of these levels were below the most stringent RCGW-1 Reportable Concentration, as detailed in the following Table 2:

**Table 2**
**Summary of UST Contents Testing Results**

| Sample ID: | UST-GW | RCGW-1 |
|---|---|---|
| **VPH (mg/l):** | | |
| $C_5$-$C_8$ Aliphatics | ND | 0.3 |
| $C_9$-$C_{12}$ Aliphatics | ND | 0.7 |
| $C_9$-$C_{10}$ Aromatics | ND | 0.2 |
| **Target VOC's (mg/l):** | ND | |

ND = Not detected above laboratory quantitation limits
**Bold** = Above RCS-1 Reportable Concentrations

## C. DEP NOTIFICATION

Based on the absence of VOC's above the 72-Hour reporting threshold (100 ppm) in the soil samples collected from the UST closure program; the low levels of EPH and MCP exemption associated with the elevated levels of PAHs in the confirmatory soil sample obtained from the UST excavation, a reportable release has NOT been identified and it is the opinion of IES, Inc. that DEP notification is NOT required at this time.

## D. MANAGEMENT OF CONTMINATED SOIL/GROUNDWATER

No contaminated soil or groundwater was encountered during the UST removal program, and therefore, the management of contaminated soil and/or groundwater was not required at this time.

## E. CONCLUSIONS

A 3,000-gallon abandoned UST was removed from the site on December 20, 2016 by Donadio Environmental Associates of Braintree, MA and Global Contracting Services of Taunton, MA, under the supervision of IES, Inc. Upon removal, the UST was noted to be in good condition, with no visible holes, pitting or other damage. Headspace screening of soil samples obtained from the sidewalls and bottoms of the UST grave, as well as from below the fill lines revealed no elevated headspace readings in any of the soil samples obtained. Additionally, laboratory testing of one composite soil sample revealed that elevated levels of several PAHs were identified in the soil sample, at concentrations above the applicable RCS-1 Reportable Concentrations. However, due to

the visual evidence of fill material in this soil sample, the soil sample was subsequently submitted to Microvision Laboratories of Chelmsford, MA for Coal Ash Microscopic analysis. According to the Microvision report, two suspect particles were identified in the confirmatory soil sample. In regard to these particles, Microvision stated that the "PLM examination indicated the particle type to be consistent with coal ash"; and "the EDS Spectrum indicates this particle type is coal ash".

Pursuant to 310 CMR 40.0317(9), "releases of oil and/or hazardous material related to coal, coal ash, or wood ash, excluding wood ash resulting from the combustion of lumber or wood products that have been treated with chemical preservatives" do not require notification. Therefore, it is the opinion of IES, Inc. that the release of PAHs identified in the soil at the site are exempt from DEP notification.

In order to determine the type of material the small amount of liquid in the bottom of the UST was, a sample of this liquid was forwarded to Phoenix Laboratories, Inc. of Manchester, CT for the testing of Volatile Petroleum Hydrocarbons (VPH) with target analytes and Extractable Petroleum Hydrocarbons (EPH) with Polycyclic Aromatic Hydrocarbons (PAHs).

The results of the testing of the UST contents revealed slightly elevated levels of Toluene and several PAHs were identified in the sample of liquid obtained from the UST. However, all of these levels were below the most stringent RCGW-1 Reportable Concentration.

Finally, it is the opinion of IES, Inc. that a reportable release was not identified during this UST removal program and as a result, **No Further Action** is necessary at the site with respect to this former UST.

IES is pleased to have been of service to you, and should you have any questions regarding this report, please do not hesitate to call our office.

Respectfully submitted,
IES, Inc.

## LIMITATIONS

1. The purpose of this UST removal program was to remove an abandoned suspect UST. The information obtained from sub-contractors, personal interviews, public records, and maps is subject to the personal recollection of those persons interviewed, and the availability and accuracy of the records on file with the State and municipal agencies. IES not be responsible for errors resulting from incorrect information provided by these sources.
2. This report was designed to assess the physical characteristics of the Site with regard to the likelihood of a release or threat of release of oil or hazardous materials and no attempt was made to investigate the regulatory compliance of the Site regarding Federal, State, or Local Laws and Regulations.
3. Our conclusions are based on the contents of this report and are a result of the interpretation of the existing data that was compiled.
4. If additional historical or analytical data becomes available, IES shall reserve the right to review this material to determine if the conclusions in this report are to be modified or updated.
5. IES has not made any attempt to definitively determine any impact that any release or threat of release, from the subject site, has on any surrounding properties nor has IES made any attempt to definitively determine any impact that any release or threat of release, from any surrounding properties, has on this subject site, therefore, if determination of said impacts are required by the Client, and in-depth subsurface exploration program must be undertaken and IES further recommends consultation with an attorney be initiated to determine the potential for liabilities.
6. Any laboratory analysis of samples collected by IES, at or beneath the site, was completed by independent laboratories. Unless otherwise noted in this Report, IES has accepted their data at face value without additional verification. No warranty the analytical results or procedures is expressed or implied by IES. Laboratory analyses are limited to those discussed in the report unless otherwise specified.
7. IES's completion of this project was performed in accordance with generally accepted practices of other consultants undertaking similar studies at the same time and in the same geographical area. IES observed a degree of care and skill generally exercised by other consultants under similar circumstances and conditions. IES's findings and conclusions must be considered not as scientific certainties, but rather as our professional opinion concerning the significance of the limited data gathered during the course of this project. No other warranty, expressed or implied, is made. IES does not and can not represent that the sites does not contain any hazardous substances, contaminants, pollutants, petroleum hydrocarbons, or any other latent conditions beyond that observed by IES during the course of this Project. The conclusions presented in this Report were based solely upon the services described therein, and not on scientific tasks or procedures beyond the scope of the described services or the time and budgetary constraints imposed by the Client.

United States Department of Agriculture

NRCS

Natural Resources Conservation Service

A product of the National Cooperative Soil Survey, a joint effort of the United States Department of Agriculture and other Federal agencies, State agencies including the Agricultural Experiment Stations, and local participants

# Custom Soil Resource Report for Middlesex County, Massachusetts

October 20, 2021

# Preface

Soil surveys contain information that affects land use planning in survey areas. They highlight soil limitations that affect various land uses and provide information about the properties of the soils in the survey areas. Soil surveys are designed for many different users, including farmers, ranchers, foresters, agronomists, urban planners, community officials, engineers, developers, builders, and home buyers. Also, conservationists, teachers, students, and specialists in recreation, waste disposal, and pollution control can use the surveys to help them understand, protect, or enhance the environment.

Various land use regulations of Federal, State, and local governments may impose special restrictions on land use or land treatment. Soil surveys identify soil properties that are used in making various land use or land treatment decisions. The information is intended to help the land users identify and reduce the effects of soil limitations on various land uses. The landowner or user is responsible for identifying and complying with existing laws and regulations.

Although soil survey information can be used for general farm, local, and wider area planning, onsite investigation is needed to supplement this information in some cases. Examples include soil quality assessments (http://www.nrcs.usda.gov/wps/portal/nrcs/main/soils/health/) and certain conservation and engineering applications. For more detailed information, contact your local USDA Service Center (https://offices.sc.egov.usda.gov/locator/app?agency=nrcs) or your NRCS State Soil Scientist (http://www.nrcs.usda.gov/wps/portal/nrcs/detail/soils/contactus/?cid=nrcs142p2_053951).

Great differences in soil properties can occur within short distances. Some soils are seasonally wet or subject to flooding. Some are too unstable to be used as a foundation for buildings or roads. Clayey or wet soils are poorly suited to use as septic tank absorption fields. A high water table makes a soil poorly suited to basements or underground installations.

The National Cooperative Soil Survey is a joint effort of the United States Department of Agriculture and other Federal agencies, State agencies including the Agricultural Experiment Stations, and local agencies. The Natural Resources Conservation Service (NRCS) has leadership for the Federal part of the National Cooperative Soil Survey.

Information about soils is updated periodically. Updated information is available through the NRCS Web Soil Survey, the site for official soil survey information.

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, age, disability, and where applicable, sex, marital status, familial status, parental status, religion, sexual orientation, genetic information, political beliefs, reprisal, or because all or a part of an individual's income is derived from any public assistance program. (Not all prohibited bases apply to all programs.) Persons with disabilities who require

alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD). To file a complaint of discrimination, write to USDA, Director, Office of Civil Rights, 1400 Independence Avenue, S.W., Washington, D.C. 20250-9410 or call (800) 795-3272 (voice) or (202) 720-6382 (TDD). USDA is an equal opportunity provider and employer.

# How Soil Surveys Are Made

Soil surveys are made to provide information about the soils and miscellaneous areas in a specific area. They include a description of the soils and miscellaneous areas and their location on the landscape and tables that show soil properties and limitations affecting various uses. Soil scientists observed the steepness, length, and shape of the slopes; the general pattern of drainage; the kinds of crops and native plants; and the kinds of bedrock. They observed and described many soil profiles. A soil profile is the sequence of natural layers, or horizons, in a soil. The profile extends from the surface down into the unconsolidated material in which the soil formed or from the surface down to bedrock. The unconsolidated material is devoid of roots and other living organisms and has not been changed by other biological activity.

Currently, soils are mapped according to the boundaries of major land resource areas (MLRAs). MLRAs are geographically associated land resource units that share common characteristics related to physiography, geology, climate, water resources, soils, biological resources, and land uses (USDA, 2006). Soil survey areas typically consist of parts of one or more MLRA.

The soils and miscellaneous areas in a survey area occur in an orderly pattern that is related to the geology, landforms, relief, climate, and natural vegetation of the area. Each kind of soil and miscellaneous area is associated with a particular kind of landform or with a segment of the landform. By observing the soils and miscellaneous areas in the survey area and relating their position to specific segments of the landform, a soil scientist develops a concept, or model, of how they were formed. Thus, during mapping, this model enables the soil scientist to predict with a considerable degree of accuracy the kind of soil or miscellaneous area at a specific location on the landscape.

Commonly, individual soils on the landscape merge into one another as their characteristics gradually change. To construct an accurate soil map, however, soil scientists must determine the boundaries between the soils. They can observe only a limited number of soil profiles. Nevertheless, these observations, supplemented by an understanding of the soil-vegetation-landscape relationship, are sufficient to verify predictions of the kinds of soil in an area and to determine the boundaries.

Soil scientists recorded the characteristics of the soil profiles that they studied. They noted soil color, texture, size and shape of soil aggregates, kind and amount of rock fragments, distribution of plant roots, reaction, and other features that enable them to identify soils. After describing the soils in the survey area and determining their properties, the soil scientists assigned the soils to taxonomic classes (units). Taxonomic classes are concepts. Each taxonomic class has a set of soil characteristics with precisely defined limits. The classes are used as a basis for comparison to classify soils systematically. Soil taxonomy, the system of taxonomic classification used in the United States, is based mainly on the kind and character of soil properties and the arrangement of horizons within the profile. After the soil

scientists classified and named the soils in the survey area, they compared the individual soils with similar soils in the same taxonomic class in other areas so that they could confirm data and assemble additional data based on experience and research.

The objective of soil mapping is not to delineate pure map unit components; the objective is to separate the landscape into landforms or landform segments that have similar use and management requirements. Each map unit is defined by a unique combination of soil components and/or miscellaneous areas in predictable proportions. Some components may be highly contrasting to the other components of the map unit. The presence of minor components in a map unit in no way diminishes the usefulness or accuracy of the data. The delineation of such landforms and landform segments on the map provides sufficient information for the development of resource plans. If intensive use of small areas is planned, onsite investigation is needed to define and locate the soils and miscellaneous areas.

Soil scientists make many field observations in the process of producing a soil map. The frequency of observation is dependent upon several factors, including scale of mapping, intensity of mapping, design of map units, complexity of the landscape, and experience of the soil scientist. Observations are made to test and refine the soil-landscape model and predictions and to verify the classification of the soils at specific locations. Once the soil-landscape model is refined, a significantly smaller number of measurements of individual soil properties are made and recorded. These measurements may include field measurements, such as those for color, depth to bedrock, and texture, and laboratory measurements, such as those for content of sand, silt, clay, salt, and other components. Properties of each soil typically vary from one point to another across the landscape.

Observations for map unit components are aggregated to develop ranges of characteristics for the components. The aggregated values are presented. Direct measurements do not exist for every property presented for every map unit component. Values for some properties are estimated from combinations of other properties.

While a soil survey is in progress, samples of some of the soils in the area generally are collected for laboratory analyses and for engineering tests. Soil scientists interpret the data from these analyses and tests as well as the field-observed characteristics and the soil properties to determine the expected behavior of the soils under different uses. Interpretations for all of the soils are field tested through observation of the soils in different uses and under different levels of management. Some interpretations are modified to fit local conditions, and some new interpretations are developed to meet local needs. Data are assembled from other sources, such as research information, production records, and field experience of specialists. For example, data on crop yields under defined levels of management are assembled from farm records and from field or plot experiments on the same kinds of soil.

Predictions about soil behavior are based not only on soil properties but also on such variables as climate and biological activity. Soil conditions are predictable over long periods of time, but they are not predictable from year to year. For example, soil scientists can predict with a fairly high degree of accuracy that a given soil will have a high water table within certain depths in most years, but they cannot predict that a high water table will always be at a specific level in the soil on a specific date.

After soil scientists located and identified the significant natural bodies of soil in the survey area, they drew the boundaries of these bodies on aerial photographs and

identified each as a specific map unit. Aerial photographs show trees, buildings, fields, roads, and rivers, all of which help in locating boundaries accurately.

# Soil Map

The soil map section includes the soil map for the defined area of interest, a list of soil map units on the map and extent of each map unit, and cartographic symbols displayed on the map. Also presented are various metadata about data used to produce the map, and a description of each soil map unit.

## MAP INFORMATION

The soil surveys that comprise your AOI were mapped at 1:25,000.

Warning: Soil Map may not be valid at this scale.

Enlargement of maps beyond the scale of mapping can cause misunderstanding of the detail of mapping and accuracy of soil line placement. The maps do not show the small areas of contrasting soils that could have been shown at a more detailed scale.

Please rely on the bar scale on each map sheet for map measurements.

Source of Map: Natural Resources Conservation Service
Web Soil Survey URL:
Coordinate System: Web Mercator (EPSG:3857)

Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: Middlesex County, Massachusetts
Survey Area Data: Version 21, Sep 2, 2021

Soil map units are labeled (as space allows) for map scales 1:50,000 or larger.

Date(s) aerial images were photographed: Aug 13, 2020—Sep 15, 2020

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background imagery displayed on these maps. As a result, some minor shifting of map unit boundaries may be evident.

# Map Unit Legend

| Map Unit Symbol | Map Unit Name | Acres in AOI | Percent of AOI |
|---|---|---|---|
| 626B | Merrimac-Urban land complex, 0 to 8 percent slopes | 0.2 | 20.3% |
| 655 | Udorthents, wet substratum | 0.7 | 79.7% |
| **Totals for Area of Interest** | | **0.9** | **100.0%** |

# Map Unit Descriptions

The map units delineated on the detailed soil maps in a soil survey represent the soils or miscellaneous areas in the survey area. The map unit descriptions, along with the maps, can be used to determine the composition and properties of a unit.

A map unit delineation on a soil map represents an area dominated by one or more major kinds of soil or miscellaneous areas. A map unit is identified and named according to the taxonomic classification of the dominant soils. Within a taxonomic class there are precisely defined limits for the properties of the soils. On the landscape, however, the soils are natural phenomena, and they have the characteristic variability of all natural phenomena. Thus, the range of some observed properties may extend beyond the limits defined for a taxonomic class. Areas of soils of a single taxonomic class rarely, if ever, can be mapped without including areas of other taxonomic classes. Consequently, every map unit is made up of the soils or miscellaneous areas for which it is named and some minor components that belong to taxonomic classes other than those of the major soils.

Most minor soils have properties similar to those of the dominant soil or soils in the map unit, and thus they do not affect use and management. These are called noncontrasting, or similar, components. They may or may not be mentioned in a particular map unit description. Other minor components, however, have properties and behavioral characteristics divergent enough to affect use or to require different management. These are called contrasting, or dissimilar, components. They generally are in small areas and could not be mapped separately because of the scale used. Some small areas of strongly contrasting soils or miscellaneous areas are identified by a special symbol on the maps. If included in the database for a given area, the contrasting minor components are identified in the map unit descriptions along with some characteristics of each. A few areas of minor components may not have been observed, and consequently they are not mentioned in the descriptions, especially where the pattern was so complex that it was impractical to make enough observations to identify all the soils and miscellaneous areas on the landscape.

The presence of minor components in a map unit in no way diminishes the usefulness or accuracy of the data. The objective of mapping is not to delineate pure taxonomic classes but rather to separate the landscape into landforms or landform segments that have similar use and management requirements. The delineation of such segments on the map provides sufficient information for the development of resource plans. If intensive use of small areas is planned, however,

onsite investigation is needed to define and locate the soils and miscellaneous areas.

An identifying symbol precedes the map unit name in the map unit descriptions. Each description includes general facts about the unit and gives important soil properties and qualities.

Soils that have profiles that are almost alike make up a *soil series*. Except for differences in texture of the surface layer, all the soils of a series have major horizons that are similar in composition, thickness, and arrangement.

Soils of one series can differ in texture of the surface layer, slope, stoniness, salinity, degree of erosion, and other characteristics that affect their use. On the basis of such differences, a soil series is divided into *soil phases*. Most of the areas shown on the detailed soil maps are phases of soil series. The name of a soil phase commonly indicates a feature that affects use or management. For example, Alpha silt loam, 0 to 2 percent slopes, is a phase of the Alpha series.

Some map units are made up of two or more major soils or miscellaneous areas. These map units are complexes, associations, or undifferentiated groups.

A *complex* consists of two or more soils or miscellaneous areas in such an intricate pattern or in such small areas that they cannot be shown separately on the maps. The pattern and proportion of the soils or miscellaneous areas are somewhat similar in all areas. Alpha-Beta complex, 0 to 6 percent slopes, is an example.

An *association* is made up of two or more geographically associated soils or miscellaneous areas that are shown as one unit on the maps. Because of present or anticipated uses of the map units in the survey area, it was not considered practical or necessary to map the soils or miscellaneous areas separately. The pattern and relative proportion of the soils or miscellaneous areas are somewhat similar. Alpha-Beta association, 0 to 2 percent slopes, is an example.

An *undifferentiated group* is made up of two or more soils or miscellaneous areas that could be mapped individually but are mapped as one unit because similar interpretations can be made for use and management. The pattern and proportion of the soils or miscellaneous areas in a mapped area are not uniform. An area can be made up of only one of the major soils or miscellaneous areas, or it can be made up of all of them. Alpha and Beta soils, 0 to 2 percent slopes, is an example.

Some surveys include *miscellaneous areas*. Such areas have little or no soil material and support little or no vegetation. Rock outcrop is an example.

# Middlesex County, Massachusetts

## 626B—Merrimac-Urban land complex, 0 to 8 percent slopes

### Map Unit Setting

*National map unit symbol:* 2tyr9
*Elevation:* 0 to 820 feet
*Mean annual precipitation:* 36 to 71 inches
*Mean annual air temperature:* 39 to 55 degrees F
*Frost-free period:* 140 to 250 days
*Farmland classification:* Not prime farmland

### Map Unit Composition

*Merrimac and similar soils:* 45 percent
*Urban land:* 40 percent
*Minor components:* 15 percent
*Estimates are based on observations, descriptions, and transects of the mapunit.*

### Description of Merrimac

#### Setting

*Landform:* Outwash plains, outwash terraces, moraines, eskers, kames
*Landform position (two-dimensional):* Backslope, footslope, summit, shoulder
*Landform position (three-dimensional):* Side slope, crest, riser, tread
*Down-slope shape:* Convex
*Across-slope shape:* Convex
*Parent material:* Loamy glaciofluvial deposits derived from granite, schist, and gneiss over sandy and gravelly glaciofluvial deposits derived from granite, schist, and gneiss

#### Typical profile

*Ap - 0 to 10 inches:* fine sandy loam
*Bw1 - 10 to 22 inches:* fine sandy loam
*Bw2 - 22 to 26 inches:* stratified gravel to gravelly loamy sand
*2C - 26 to 65 inches:* stratified gravel to very gravelly sand

#### Properties and qualities

*Slope:* 0 to 8 percent
*Depth to restrictive feature:* More than 80 inches
*Drainage class:* Somewhat excessively drained
*Runoff class:* Very low
*Capacity of the most limiting layer to transmit water (Ksat):* Moderately high to very high (1.42 to 99.90 in/hr)
*Depth to water table:* More than 80 inches
*Frequency of flooding:* None
*Frequency of ponding:* None
*Calcium carbonate, maximum content:* 2 percent
*Maximum salinity:* Nonsaline (0.0 to 1.4 mmhos/cm)
*Sodium adsorption ratio, maximum:* 1.0
*Available water supply, 0 to 60 inches:* Low (about 4.6 inches)

#### Interpretive groups

*Land capability classification (irrigated):* None specified
*Land capability classification (nonirrigated):* 2e
*Hydrologic Soil Group:* A

*Ecological site:* F144AY022MA - Dry Outwash
*Hydric soil rating:* No

### Description of Urban Land

#### Typical profile

*M - 0 to 10 inches:* cemented material

#### Properties and qualities

*Slope:* 0 to 8 percent
*Depth to restrictive feature:* 0 inches to manufactured layer
*Runoff class:* Very high
*Capacity of the most limiting layer to transmit water (Ksat):* Very low (0.00 to 0.00 in/hr)
*Available water supply, 0 to 60 inches:* Very low (about 0.0 inches)

#### Interpretive groups

*Land capability classification (irrigated):* None specified
*Land capability classification (nonirrigated):* 8
*Hydrologic Soil Group:* D
*Hydric soil rating:* Unranked

### Minor Components

#### Hinckley

*Percent of map unit:* 5 percent
*Landform:* Deltas, kames, eskers, outwash plains
*Landform position (two-dimensional):* Summit, shoulder, backslope
*Landform position (three-dimensional):* Nose slope, crest, head slope, side slope, rise
*Down-slope shape:* Convex
*Across-slope shape:* Convex, linear
*Hydric soil rating:* No

#### Sudbury

*Percent of map unit:* 5 percent
*Landform:* Deltas, terraces, outwash plains
*Landform position (two-dimensional):* Footslope
*Landform position (three-dimensional):* Tread, dip
*Down-slope shape:* Concave
*Across-slope shape:* Linear
*Hydric soil rating:* No

#### Windsor

*Percent of map unit:* 5 percent
*Landform:* Outwash terraces, dunes, outwash plains, deltas
*Landform position (three-dimensional):* Tread, riser
*Down-slope shape:* Linear, convex
*Across-slope shape:* Linear, convex
*Hydric soil rating:* No

## 655—Udorthents, wet substratum

### Map Unit Setting

*National map unit symbol:* vr1n
*Elevation:* 0 to 3,000 feet
*Mean annual precipitation:* 32 to 54 inches
*Mean annual air temperature:* 43 to 54 degrees F
*Frost-free period:* 110 to 240 days
*Farmland classification:* Not prime farmland

### Map Unit Composition

*Udorthents, wet substratum, and similar soils:* 85 percent
*Minor components:* 15 percent
*Estimates are based on observations, descriptions, and transects of the mapunit.*

### Description of Udorthents, Wet Substratum

#### Setting

*Parent material:* Loamy alluvium and/or sandy glaciofluvial deposits and/or loamy glaciolacustrine deposits and/or loamy marine deposits and/or loamy basal till and/or loamy lodgment till

#### Properties and qualities

*Slope:* 0 to 8 percent
*Depth to restrictive feature:* More than 80 inches
*Depth to water table:* More than 80 inches
*Frequency of flooding:* None
*Frequency of ponding:* None

### Minor Components

#### Urban land

*Percent of map unit:* 8 percent
*Landform position (two-dimensional):* Footslope
*Landform position (three-dimensional):* Base slope
*Down-slope shape:* Linear
*Across-slope shape:* Linear

#### Freetown

*Percent of map unit:* 4 percent
*Landform:* Depressions, bogs
*Landform position (two-dimensional):* Toeslope
*Landform position (three-dimensional):* Dip
*Down-slope shape:* Concave
*Across-slope shape:* Concave
*Hydric soil rating:* Yes

#### Swansea

*Percent of map unit:* 3 percent

*Landform:* Depressions, bogs
*Landform position (two-dimensional):* Toeslope
*Landform position (three-dimensional):* Dip
*Down-slope shape:* Concave
*Across-slope shape:* Concave
*Hydric soil rating:* Yes

# EXECUTIVE SUMMARY

## DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

## RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by The Vertex Companies, Inc. were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by The Vertex Companies, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

# EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

**SURROUNDING SITES: SEARCH RESULTS**

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

**STANDARD ENVIRONMENTAL RECORDS**

***Federal RCRA generators list***

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/22/2021 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

| Equal/Higher Elevation | Address | Direction / Distance | Map ID | Page |
|---|---|---|---|---|
| 882-892 MASSACHUSETT | 882-892 MASSACHUSETT | SSE 1/8 - 1/4 (0.232 mi.) | M56 | 237 |

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/22/2021 has revealed that there are 2

RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 03/22/2021 has revealed that there are 5 RCRA-VSQG sites within approximately 0.25 miles of the target property.

***State and tribal registered storage tank lists***

MA UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Protection's Summary Listing of all the Tanks Registered in the State of Massachusetts.

A review of the MA UST list, as provided by EDR, and dated 07/09/2021 has revealed that there are 7 MA UST sites within approximately 0.25 miles of the target property.

**ADDITIONAL ENVIRONMENTAL RECORDS**

***Other Ascertainable Records***

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/22/2021 has revealed that there are 8 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

**EDR HIGH RISK HISTORICAL RECORDS**

***EDR Exclusive Records***

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there are 2 EDR MGP sites within approximately 1 mile of the target property.

| ARLINGTON GAS LIGHT | SACHEM AVE | E 1/2 - 1 (0.741 mi.) | 109 | 520 |

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 2 EDR Hist Auto sites within approximately 0.125 miles of the target property.

# EXECUTIVE SUMMARY

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within approximately 0.125 miles of the target property.

Phase: Not reported
Response Action Outcome: A2
Oil Or Haz Material: Oil and Hazardous Material

Release:
Name: NO LOCATION AID
Address: 29 DUDLEY ST
City,State,Zip: ARLINGTON, MA 024760000
Release Tracking Number/Current Status: 3-0018101 / RAO
Primary ID: Not reported
Official City: ARLINGTON
Notification: 03/19/1999
Category: 120 DY
Status Date: 12/03/1999
Phase: Not reported
Response Action Outcome: A2 - A permanent solution has been achieved. Contamination has not been reduced to background.

**NO LOCATION AID (Continued)** **S103812165**

Oil / Haz Material Type: Oil and Hazardous Material

Actions:

Action Type: Response Action Outcome - RAO
Action Status: Fee Received - FMCRA Use Only
Action Date: 12/2/1999
Response Action Outcome: A permanent solution has been achieved. Contamination has not been reduced to background.

Action Type: Response Action Outcome - RAO
Action Status: RAO Statement Received
Action Date: 12/3/1999
Response Action Outcome: A permanent solution has been achieved. Contamination has not been reduced to background.

Action Type: Release Disposition
Action Status: Reportable Release under MGL 21E
Action Date: 3/19/1999
Response Action Outcome: A permanent solution has been achieved. Contamination has not been reduced to background.

Action Type: RNF
Action Status: Reportable Release under MGL 21E
Action Date: 3/19/1999
Response Action Outcome: A permanent solution has been achieved. Contamination has not been reduced to background.

Action Type: Release Abatement Measure
Action Status: Written Plan Received
Action Date: 6/11/1999
Response Action Outcome: A permanent solution has been achieved. Contamination has not been reduced to background.

Action Type: Release Abatement Measure
Action Status: Fee Received - FMCRA Use Only
Action Date: 6/14/1999
Response Action Outcome: A permanent solution has been achieved. Contamination has not been reduced to background.

Action Type: A Notice sent to a Potentially Responsible Party (PRP)
Action Status: A MassDEP piece of correspondence was issued (approvals, NORs, etc.
Action Date: 6/21/1999
Response Action Outcome: A permanent solution has been achieved. Contamination has not been reduced to background.

Chemicals:

Chemical: C19 THRU C36 ALIPHATIC HYDROCARBONS
Quantity: 12000 milligrams per kilogram
Chemical: 2-METHYLNAPHTHALENE
Quantity: 23 milligrams per kilogram
Chemical: C9 THRU C18 ALIPHATIC HYDROCARBONS
Quantity: 35000 milligrams per kilogram
Chemical: ACENAPHTHENE
Quantity: 54 milligrams per kilogram

**NO LOCATION AID (Continued)** **S103812165**

| | |
|---|---|
| Chemical: | BENZO[A]ANTHRACENE |
| Quantity: | 4.7 milligrams per kilogram |
| Chemical: | C11 THRU C22 AROMATIC HYDROCARBONS |
| Quantity: | 3500 milligrams per kilogram |

Hazardous Waste Summary:
Waste Code: D001

**ARLINGTON AUTOBODY & BRAKE INC (Continued)** **1004715944**

Waste Description: IGNITABLE WASTE

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Update: 2015-12-03 00:00:00
Update by: John Vetere
Fac status: OPEN

Tank ID: 1
**Tank Status:** **Tank Removed**
Status Date: 12/07/1998
Date Installed: 01/01/1981
Capacity: 4000.00000
Contents: Diesel

**MWRA - BRATTLE COURT PUMP STATION (Continued)** **U000748020**

Tank Usage: Not reported
Tank Leak Detection: Manual Tank Gauging (1,000G or more capacity tank)
Pipe Leak Detection: Not reported
Latitude: Not reported
Longitude: Not reported
Tank construct: Single-walled metal tank (cathodic protection required)
Pipe construct: Single-walled metal (Corrosion protection required)
Ptype: Not reported
Number of compartment: Not reported
Pipe install date: Not reported
Pipe leak install date: Not reported
Submersible sump: N
Submersible sump install date: Not reported
Turbine sump: N
Turbine sump sensor: N
Intermediate sump: N
Intermediate sump sensor: N
Spill bucket installed date: Not reported
Spill bucket sensor: N
Overfill protect install: Not reported
Overfill protect type: Not reported
Automatic line leak detect: Not reported
Tank corrosion type: Not reported
Leak corrosion type: Not reported

Tank ID: 2
**Tank Status: In Use**
Status Date: Not reported
Date Installed: 01/17/1999
Capacity: 6000.00000
Contents: Diesel
Tank Usage: Emergency
Tank Leak Detection: Continuous Interstitial Monitoring
Pipe Leak Detection: Continuous Interstitial Space Monitoring
Latitude: 42.42247
Longitude: -71.16981
Tank construct: Double-walled non-corrodible (including "composite") material (cathodic protection not required)
Pipe construct: Double-walled non-corrodible material (No corrosion protection required)
Ptype: European suction system
Number of compartment: Not reported
Pipe install date: 01/17/1999
Pipe leak install date: 01/17/1999
Submersible sump: N
Submersible sump install date: Not reported
Turbine sump: Y
Turbine sump sensor: Y
Intermediate sump: N
Intermediate sump sensor: N
Spill bucket installed date: 01/17/1999
Spill bucket sensor: N
Overfill protect install: 01/17/1999
Overfill protect type: Automatic shut-off valve
Automatic line leak detect: Not reported
Tank corrosion type: Not reported
Leak corrosion type: Not reported

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.
AIR EMISSIONS CLASSIFICATION UNKNOWN
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

**STANDARD ENVIRONMENTAL RECORDS**

***Federal NPL site list***

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 07/29/2021

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 07/29/2021

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

***Federal Delisted NPL site list***

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

***Federal CERCLIS NFRAP site list***

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

***Federal RCRA non-CORRACTS TSD facilities list***

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/22/2021

***Federal RCRA generators list***

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/22/2021
Date Data Arrived at EDR: 03/23/2021

***State and tribal Brownfields sites***

BROWNFIELDS: Completed Brownfields Covenants Listing

Under Massachusetts law, M.G.L. c. 21E is the statute that governs the cleanup of releases of oil and/or hazardous material to the environment. The Brownfields Act of 1998 amended M.G.L. c. 21E by establishing significant liability relief and financial incentives to spur the redevelopment of brownfields, while ensuring that the Commonwealth's environmental standards are met. Most brownfields are redeveloped with the benefit of liability protections that operate automatically under M.G.L. c. 21E.

Date of Government Version: 04/05/2017

**ADDITIONAL ENVIRONMENTAL RECORDS**

***Local Brownfield lists***

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006
Date Data Arrived at EDR: 03/01/2007

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

**EDR HIGH RISK HISTORICAL RECORDS**

***EDR Exclusive Records***

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

**OTHER DATABASE(S)**

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 03/24/2021
Date Data Arrived at EDR: 05/11/2021

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on private school locations in the United States.

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

# GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM

**TARGET PROPERTY ADDRESS**

34 DUDLEY STREET
34 DUDLEY STREET
ARLINGTON, MA 02476

**TARGET PROPERTY COORDINATES**

| | |
|---|---|
| Latitude (North): | 42.420437 - 42° 25' 13.57'' |
| Longitude (West): | 71.166122 - 71° 9' 58.04'' |
| Universal Tranverse Mercator: | Zone 19 |
| UTM X (Meters): | 321783.8 |
| UTM Y (Meters): | 4698517.5 |
| Elevation: | 80 ft. above sea level |

**USGS TOPOGRAPHIC MAP**

| | |
|---|---|
| Target Property Map: | 5646205 LEXINGTON, MA |
| Version Date: | 2012 |

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

**GROUNDWATER FLOW DIRECTION INFORMATION**

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

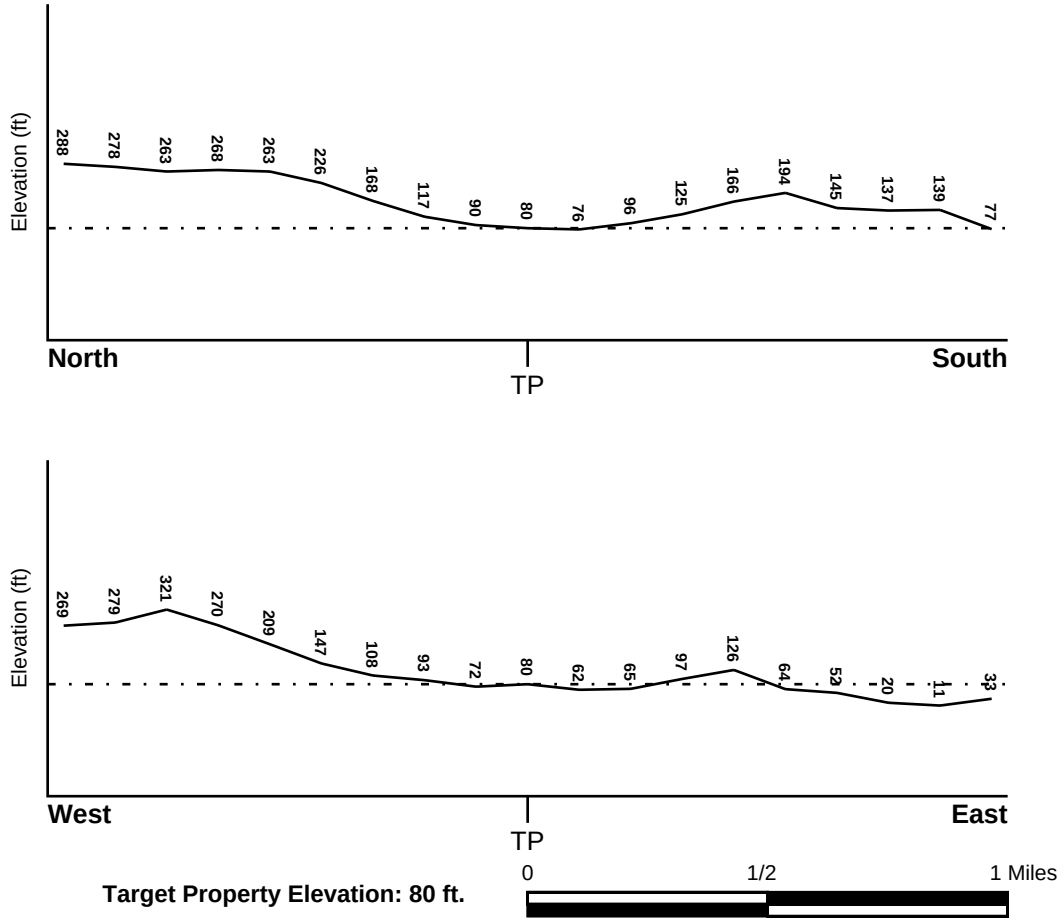

**TOPOGRAPHIC INFORMATION**

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

**TARGET PROPERTY TOPOGRAPHY**

General Topographic Gradient: General ESE

**SURROUNDING TOPOGRAPHY: ELEVATION PROFILES**

**Target Property Elevation: 80 ft.**

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

**HYDROLOGIC INFORMATION**

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

**FEMA FLOOD ZONE**

| Flood Plain Panel at Target Property | FEMA Source Type |
|---|---|
| 25017C0416E | FEMA FIRM Flood data |

| Additional Panels in search area: | FEMA Source Type |
|---|---|
| 25017C0417E | FEMA FIRM Flood data |
| 25017C0418E | FEMA FIRM Flood data |

**NATIONAL WETLAND INVENTORY**

| NWI Quad at Target Property | NWI Electronic Data Coverage |
|---|---|
| LEXINGTON | YES - refer to the Overview Map and Detail Map |

**HYDROGEOLOGIC INFORMATION**

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

**AQUIFLOW®**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

| MAP ID | LOCATION FROM TP | GENERAL DIRECTION GROUNDWATER FLOW |
|---|---|---|
| B11 | 1/2 - 1 Mile WNW | S |
| C12 | 1/2 - 1 Mile East | E |
| D16 | 1/2 - 1 Mile ESE | SW |
| 1G | 1/2 - 1 Mile WNW | S |
| 2G | 1/2 - 1 Mile East | E |
| 3G | 1/2 - 1 Mile ESE | SW |

For additional site information, refer to Physical Setting Source Map Findings.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

**GROUNDWATER FLOW VELOCITY INFORMATION**

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

**GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY**

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

**ROCK STRATIGRAPHIC UNIT**

| | |
|---|---|
| Era: | Paleozoic |
| System: | Mississippian |
| Series: | Paleozoic mafic intrusives |
| Code: | Pzmi *(decoded above as Era, System & Series)* |

**GEOLOGIC AGE IDENTIFICATION**

Category: Plutonic and Intrusive Rocks

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

**DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY**

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

| Soil Layer Information | | | | | | | |
|---|---|---|---|---|---|---|---|
| | Boundary | | | Classification | | | |
| Layer | Upper | Lower | Soil Texture Class | AASHTO Group | Unified Soil | Permeability Rate (in/hr) | Soil Reaction (pH) |
| 1 | 0 inches | 6 inches | variable | Not reported | Not reported | Max: 0.00<br>Min: 0.00 | Max: 0.00<br>Min: 0.00 |

**OTHER SOIL TYPES IN AREA**

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: fine sandy loam
silt loam
very fine sandy loam

Surficial Soil Types: fine sandy loam
silt loam
very fine sandy loam

Shallow Soil Types: No Other Soil Types

Deeper Soil Types: fine sandy loam
channery - silt loam
gravelly - loamy sand
silt loam
loamy fine sand
stratified
gravelly - sandy loam

**LOCAL / REGIONAL WATER AGENCY RECORDS**

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

**WELL SEARCH DISTANCE INFORMATION**

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

## HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: MassDEP
Telephone: 617-292-5907

## HYDROGEOLOGIC INFORMATION

AQUIFLOW$^{R}$ Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

**LOCAL / REGIONAL WATER AGENCY RECORDS**

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Massachusetts Geographic Information System (MassGIS) Datalayers
Source: Executive Office of Environmental Affairs
Telephone:

Public Water Supply Database

Telephone:
The Public Water Supply datalayer contains the locations of public community surface and groundwater supply sources and public non-community supply sources as defined in 310 CMR 22.00.

Areas of Critical Environmental Concern

Telephone:
The Areas of Critical Environmental Concern (ACEC) datalayer shows the location of areas that have been designated ACECs by the Secretary of Environmental Affairs. ACEC designation requires greater environmental review of certain kinds of proposed development under state jurisdiction within the ACEC boundaries. The ACEC Program is administered by the Department of Environmental Management (DEM) on behalf of the Secretary of Environmental Affairs. The Massachusetts Coastal Zone Management (MCZM) Office managed the original Coastal ACEC Program from 1978 to 1993, and continues to play a key role in monitoring coastal ACECs. Procedures for ACEC designation and the general policies governing the effects of designation are contained in the ACEC regulations (301 CMR 12.00). The ACEC datalayer has been compiled by MCZM and DEM and includes both coastal and inland areas.

EPA Designated Sole Source Aquifers

Telephone:
The Sole Source Aquifer datalayer was compiled by the Department of Environmental Protection (DEP) Division of Water Supply (DWS). Seven Sole Source Aquifers have been designated by the US Environmental Protection Agency (EPA) for Massachusetts. A Sole Source Aquifer (SSA) is an aquifer designated by US EPA as the sole or principal source of drinking water for a given aquifer service area; that is, an aquifer which is needed to supply 50% or more of the drinking water for that area and for which there are no reasonably available alternative sources should that aquifer become contaminated. The aquifers were defined by an EPA hydrogeologist.

Aquifers

Telephone:
MassGIS produced an aquifer datalayer composed of 20 individual panels, generally based on the boundaries of the major drainage basins. Areas of high and medium yield were mapped. This datalayer includes polygon attribute coding to help in the identification of areas in which cleanup of hazardous waste sites must meet drinking water standards, as defined in the Massachusetts Contingency Plan (MCP) (310 CMR 40.00000).

Non-Potential Drinking Water Source Areas

Telephone:
Non-Potential Drinking Water Source Areas (NPDWSA) are regulatory in nature representing one of many considerations used in determining the standards to which ground water must be cleaned in the event of a release of oil or hazardous material. NPDWSAs are not based on existing water quality and do not indicate poor ambient conditions.

Telephone:

## OTHER STATE DATABASE INFORMATION

RADON

State Database: MA Radon
Source: Department of Health
Telephone: 413-586-7525
Radon Test Results

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary faultlines, prepared in 1975 by the United State Geological Survey

# John Pelkey | Project Manager

**EMAIL** jpelkey@vertexeng.com | **PHONE** (813)437-6562

## BIOGRAPHY

Mr. Pelkey has been a dedicated member of The Vertex Companies since 2015. Mr. Pelkey performs and manages Phase I Environmental Site Assessments, Phase II Limited Subsurface Investigations, Property Condition Assessments, Transaction Screens, Energy Audits, and Limited Compliance Reviews. Additional assessments include visual mold, asbestos, and lead-based paint surveys, radon testing, and lead in drinking water sampling. Mr. Pelkey represents VERTEX as a Certified Radon Measurement Specialist in the State of Florida. Though established on the gulf coast of Florida, Mr. Pelkey has conducted assessments across the United States and Mexico for a wide range of clients. Typical projects vary from multi-family residential complexes to large industrial warehouse facilities. Mr. Pelkey was educated at Saint Michael's College in Colchester, Vermont where he graduated with a Bachelor of Science and Arts in Business Administration and Environmental Studies.

## Stephen McCarthy | Vice President, National Technical Lead

**EMAIL** smccarthy@vertexeng.com | **PHONE** 781.952.6000

### BIOGRAPHY

Mr. McCarthy has over 33 years of experience in Environmental Consulting. As the National Technical Lead for the environmental due diligence practice at VERTEX, Mr. McCarthy is responsible for the development and implementation of environmental due diligence practices for the company. He has routinely managed several hundred environmental assessment due diligence projects per year for financial, commercial, institutional and industrial clients. These projects included Phase I and Phase II Environmental Site Assessments, asbestos surveys and abatement, mold assessments, removal of underground storage tanks and site investigations.

As the National Technical Lead, Mr. McCarthy is responsible for document review, quality control and client management for environmental due diligence investigations conducted throughout the United States. Mr. McCarthy is also responsible for managing the set up and timely completion of due diligence services including Phase I ESAs, planning and management of Phase II subsurface investigations and remediation projects. Specifically, this work includes observation of properties and operations, historic site research, delineation of contaminated media, coordinating UST removals, oversight of excavation activities, development of remediation strategies, risk evaluations and serving as the liaison for clients.

### EDUCATION/TRAINING

B.A., History, Providence College 1986

### LICENSES/CERTIFICATIONS

OSHA 40 Hour HAZWOPER

### SPECIAL TRAINING

Asbestos Inspector / Management Planner
AHERA Project Designer
ASTM - Environmental Site Assessments for Commercial Real Estate, Standards Training Course
National Brownfield Association – All Appropriate Inquiry Course
ASTM – Assessment of Vapor Intrusion Into Structures on Property Involved in Real Estate Transactions
